13TH ANNUAL CONFERENCE ON TEACHING & LEARNING

**MAY
8-10**

LOOKING WITHIN & LOOKING BEYOND

WELCOME!

The Innovation in Learning Center welcomes faculty, staff, and students from the University of South Alabama and our regional partner schools, University of Mobile, Spring Hill College, Bishop State Community College, Coastal Alabama Community College, and Mississippi Gulf Coast Community College to celebrate our 13th Annual Conference on Teaching and Learning (CoTL). We're delighted to be a part of such a diverse audience of educators and scholars who convene, either virtually or physically, to share and engage with innovative instructional practices. #CoTL2023

Dear Colleagues,

It is our honor to welcome you to the 13th Annual South Alabama Conference on Teaching and Learning. This year's conference features an evening kickoff on May 8 with a special musical performance, a full day of in person activities on May 9 and engaging online sessions on May 10.

Our 2023 conference theme is supported by outstanding keynote speakers and a rich set of peer reviewed contributions from faculty at several different institutions. "Looking Within and Looking Beyond" resonates for us at South Alabama as we recently completed a SACSCOC accreditation site visit that marks the start of an ambitious five year Quality Enhancement Plan to LEVEL UP – uniquely prepare students for what comes next. Scholarly innovations by faculty at South and our regional institutions is critical to make sure our students are receiving the latest research-informed teaching approaches to ensure they are well prepared when they graduate.

CoTL features almost 50 contributed presentations in formats such as workshops, panels, research talks, roundtables and posters. It will make for a very full and rewarding two days as we also enjoy the keynotes from Bryan Dewsbury (a nationally known STEM educator), Neil Silcox (a Canadian dramatist and educator) and Derek Bruff (well known educational technology author). I would also like to thank the 23 reviewers who have provided feedback to ensure all CoTL presentations are aligned with the theme and appropriate for their chosen audience and format.

It is our distinct pleasure to host this regional conference which helps highlight the central role that scholarly instructional practices play in the lives of our institutions. I am so pleased that our partner institutions are all active participants and contributors to this year's program.

Welcome to CoTL 2023!

AKent

Andrea (Andi) M. Kent, Ph.D.
Executive Vice President & Provost
University of South Alabama

KEYNOTE SPEAKER

Bryan Dewsbury
Associate Professor, Biological Sciences
Florida International University

Beyond Inclusion: Teaching for Civic Participation & Democratic Engagement

In this talk we will discuss the role of the college classroom in preparing students, not simply to be technical participants in society through subject-matter careers, but also civic participants through the development of behaviors endearing them to successfully navigating difference and social challenge. We will discuss the ways in which some of these pedagogies are explicit, but others are implicit and embedded in the way we construct environments that relentlessly welcome students into our spaces of learning.

FEATURED SPEAKER

Neil Silcox
Faculty Excellence Developer
Maple League of Universities

Play's the Thing: Lessons in Experimentation from the Theatre Studio to Every Classroom

We often tell our students that college is where they should be taking risks, getting messy, and learning from their failures – but how much do we embrace these principles in our teaching and course design? This practical workshop will help us understand how we can embrace our false steps, flops, and fiascos in order to help us discover unexpected paths to success in the classroom.

KEYNOTE SPEAKER

Derek Bruff
Educator, Author, Consultant

Leading Lines: Inventing the Future of Educational Technology

Predicting the future is hard, at least for those of us without crystal balls. Inventing the future, however, is something we can all do, if not directly, then by sharing our ideas about what we want from the future. In this session, we'll do a little inventing of the future of teaching and technology. By reflecting on recent educational technology trends and understanding the teaching and learning principles that are at play in all educational contexts, we'll point the way to the future of digital learning and digital pedagogy that we want to see.

THANK YOU TO OUR PARTNER SCHOOLS FOR HELPING MAKE THIS POSSIBLE!
