FOREWORD

The Annual Report for the College of Medicine chronicles the accomplishments of the faculty, students, residents, fellows and staff in teaching, research, patient care, community service and scholarly activities during the 2012-13 academic year. Our faculty and administration continued to work diligently to avoid compromising the educational and other missions of our college in the face of financial reductions in state funding and patient service revenues over the past five years.

A concerted effort was made this year by faculty in our basic science and clinical departments to implement the new organ-system, competency-based curriculum for the first two years of medical school. The inclusion of additional active learning exercises, meaningful encounters with standardized patients, and realistic opportunities for early clinical experiences as part of this new curriculum required a significant degree of coordination by the Office of Medical Education and a genuine commitment of time and effort by many dedicated members of our faculty. All indicators of student performance during the initial year of the new curriculum are highly encouraging and appear favorable for future success.

We received notification that the Liaison Committee on Medical Education (LCME) voted at its February, 2013 meeting to continue the college’s full accreditation status of the medical education program leading to the MD degree. The program’s next full survey will take place during the 2018-2019 academic year.

In keeping with events highlighting the University’s 50 year anniversary, the Dean’s Office published an Anniversary issue recognizing past, present, and future perspectives on our college’s contributions and impact on the university’s half-century history. Drs. Arnold Luterman and Charles Rodning, two long-standing members of the surgery department, have been recently recognized by the University for their outstanding contributions in medical education, research and patient care over more than three decades of service. This year’s annual report is dedicated to these two exemplary colleagues in recognition of their historical contributions and beneficial legacy.

Samuel J. Strada, Ph.D., Dean

V. NATIONAL PROFESSIONAL RECOGNITION

William Gerthoffer: Planning Committee Member, RSF Assembly of the Amer. Thoracic Society; Co-chair NIH, SEP Asthma, Allergy, and Environmental Exposure; Reviewer, Oak Ridge Associated Universities, Junior Faculty Enhancement Awards; Reviewer, Nottingham Research Fellowships, Univ. Nottingham, UK; Reviewer Swiss National Science Foundation; Editorial Boards: Amer. J. Physiology, Cell Physiology, Amer. J. Physiology, Lung Cell and Molecular, Cell Health and Cytoskeleton, Comprehensive Physiology, Frontiers in Pharmacology; Associate Editor: Respiratory Physiology.

Richard Honkanen: Review Group Panel Member, NIH ZRG1 BST-J51-NIH Roadmap Initiative (Assay Development for High Throughput Molecular Screening); Reviewer: The Open Enzyme Inhibition Journal JBC, JCB, Nature, PNAS.

Petra Rocic: Reviewer: American Heart Association (Student Undergraduate & Health Science Fellowships), Italian Ministry of Health (Cardiovascular); Editorial Boards: American Journal of Physiology: Heart and Circulatory Physiology, Microcirculation, Circulation Research; Associate Editor: Journal of Biochemical and Pharmacological Research; Reviewer: Vascular Pharmacology, Arteriosclerosis, Thrombosis and Vascular Biology, Antioxidants and Redox Signaling, Microvascular Research, Journal of Vascular Research, Circulation, Hypertension.

VI. BRIEF SUMMARY OF ACTIVITIES AND PROGRESS

Education activities in the department have focused on revising the medical curriculum and continuing to contribute to graduate education. Several faculty members made substantial contributions to development and delivery of the new organ systems-based medical curriculum that emphasizes competency-oriented instruction. The faculty added case-based lectures, self-directed learning lessons and team-based learning lessons to the Foundations of Human Health module and the Cardiovascular module. Significant contributions were also made to the Digestive module to be delivered in the Fall of 2013. The faculty all contributed to multiple IDL graduate courses and participated in the Lung Biology, Vascular Biology, Cancer Biology and Cell and Molecular Biology tracks of the graduate program. Eight graduate students trained with department faculty members (Gerthoffer, S. Gupte, Rocic, Cioffi, LeClaire and Lim). Two students (J. McLendon and B. Comer) received abstract awards at the 2013 Amer. Thoracic Society meeting for their work on pulmonary hypertension and airway smooth muscle cell biology. One student, Sukrutha Chettimada, finished her degree and is a pursuing research positions in the
Boston area. The department also contributed to biomedical science education by hosting freshman sophomore medical students and a USA undergraduate in the Summer Research programs.

Research activity in all labs remains strong. Two mid-level faculty members direct active labs funded by NIH grants to study coronary collateral formation (Rocic) and calcium signaling in pulmonary vascular endothelium (D. Cioffi). Another junior faculty member, Dr. Lim, is funded by a Scientist development grant from AHA National Center to investigate novel nuclear functions of focal adhesion kinase. The senior faculty R. Honkanen (Protein phosphatase-5, cholesterol metabolism) and W. Gerthoffer (small heat shock proteins, miRNAs in pulmonary hypertension, markers of atherosclerosis) continue to be supported by multiple NIH grants. In addition, new grant applications from every faculty member have either been submitted, or are in development. A new predoctoral fellowship from the American Heart Association was awarded to Jared McLendon, (Gerthoffer) whose work on novel RNAi-therapy of pulmonary hypertension was highlighted at the 2013 meeting of the Amer. Thoracic Soc. Dr. A. Vasauskas working with Dr. D. Cioffi is supported by an NIH NRSA postdoctoral fellowship. Rebecca Hutcheson (GSIV) training with Dr. Rocic was supported by an AHA predoctoral fellowship. Two of Dr. Rocic’s medical student research trainees have been successful in pursuing their work on coronary collateral development during their clinical training. The faculty funding, publication rate and impact are nationally competitive on a per capita basis. The faculty have significant impact in their respective fields as demonstrated by publications, invited reviews and invitations to speak at symposia at national meetings (Gerthoffer, Rocic, Honkanen, LeClaire) and at other universities. The faculty also contribute significantly to regional and national peer review, serving on peer review committees for AHA, the NIH and American Cancer Society as well as ad hoc service for international granting agencies. Several faculty members serve on journal editorial boards and contribute regularly as peer reviewers. With a solid base of funded, productive biomedical researchers the department anticipates continued growth in scholarship and impact on our respective scientific fields.

V. NATIONAL PROFESSIONAL RECOGNITION

Ronald Balczon: Grant Reviewer, Florida Department of Health, Ad Hoc Reviewer, The Lytmos Group LLC.

Phillip Fields: Member, Society for the Study of Reproduction.

Anthony Gard: Ad Hoc Reviewer, *Journal of Neuroscience*.

Steve Kayes: Member, American Society of Parasitologists; Member of the Board, Alabama Department of Rehabilitation Services.

Susan LeDoux: Editorial Boards: *DNA Repair, Science, Brain Research, Aging and Development, J Neuroscience, Carcinogenesis, Nucleic Acids Research; Journal Peer Review, DNA Repair; Member, Physiology and Cell Biology Item Writing Committee of NBME*.

Jeffrey Sosnowski: LCME Faculty Fellow full site visit team.

Glenn Wilson: Member, Editorial Board, *Molecular Development and Aging*; Member, NIH F08 Fellowship Review; Chair, NIH/NIEHS Victor Competitive Revisions Study Section; Member, NIH Fellowship Study Section for Genes, Genomes and Genetics; Member, various NIH Study Section phone & video conferences; USA National Alumni Association 2013 Russ and Robin Lea Faculty Innovation Award.

VI. BRIEF SUMMARY OF ACTIVITIES AND PROGRESS

The Department places strong emphasis on both teaching and research. To enhance its research efforts, the Department sponsored visits from five distinguished scientists to meet with members in the Department and to present seminars on their research. Dr. Roger Simon from Morehouse School of Medicine presented a seminar titled “Epigenetic modulation of gene expression governs the brain’s response to injury” on October 4, 2012. Dr. Luis Fernandez from the University of Wisconsin presented a seminar titled “Islet transplantation. What have we learned in the last 10 years?” on November 1, 2012. Dr. David Lefer from Emory University presented a seminar titled “Hydrogen sulfide and cardiovascular disease” on December 6, 2012. Dr. Mark Bevensee from UAB presented a seminar titled “Regulation of the electrogenic Na/bicarbonate cotransporter NBCe1 by phosphoinositides” on February 7, 2013. Dr. Deborah Muoio from Duke University presented a seminar titled “Nutrient control of mitochondrial fluxibility” on March 21, 2013. The Department also hosted a seminar by Dr. Mark Gillespie, Chair of the Department of Pharmacology, USA titled “Endothelial cell responses to oxidant stress: A tale of two genomes” on September 13, 2012.

The Department continued to play a vital role in the teaching mission in the College of Medicine. Department faculty members have participated in every module in the new curriculum and have served as Module Directors in three of these. In addition, faculty members from this Department participated in the teaching of IDL I and IDL II, the Methods course and the Seminar course for first year graduate students. Moreover, they taught in IDL 630 and 631 for more advanced graduate students. In the area of resident training, a course on Pelvic Anatomy was provided for Residents in the Department of Obstetrics and Gynecology. Finally, a Department member was responsible for the presentation of the summer DREAM Program.

Due to budgetary constraints the Department was unable to recruit any new faculty over the past year. However, it is still a goal to increase the Neuroscience focus when it is possible to identify new faculty in the future. Also, there is a need to increase the number of faculty who can teach Gross Anatomy and Histology in the new Medical School curriculum.

IV. INVITED PRESENTATIONS

V. NATIONAL PROFESSIONAL RECOGNITION

Dr. A. Michele Schuler: Peer Reviewer, American Journal of Primatology, the Journal of Medical Primatology, Journal of the American Association of Laboratory Animal Science, and Comparative Medicine.
VI. BRIEF SUMMARY OF ACTIVITIES AND PROGRESS

The faculty and staff of the Department of Comparative Medicine participate in service, education, and research in the university’s animal care and use program. The department continues to upgrade and maximize the use of facilities with the goal of enhancing research and teaching capabilities for the benefit of investigators throughout the university. The department supports the operation of the Vevo high resolution ultrasound imaging system from VisualSonics, the hypoxia core for the development of pulmonary hypertensive rodents, the *Pseudomonas* delivery core, Kimtron, Inc. IC-320 irradiator, IVIS Spectrum Imaging System, and histology services. Drs. Schuler and Scammell have been active consultants in the design and construction of the animal facilities in the new BSL-3 Laboratory of Infectious Diseases.

The faculty continued formal and informal educational commitments within the department to technical staff, supervisors, and colleagues and outside the department to graduate students, postdoctoral fellows, and faculty. Dr. Schuler’s involvement in collaboration and education reaches broadly within the medical school with formal interaction with research groups in the Mitchell Cancer Institute and the Departments of Microbiology and Immunology, Cell Biology and Neuroscience, and Physiology. We welcome a licensed veterinary technician Leigh Ann Wiggins to the department. Ms. Wiggins has more than fifteen years of experience working in both academic and private settings and will enhance interaction with our patrons. Members of the department play significant roles in other aspects of medical school life as well. Dr. Scammell serves as Assistant Dean for Admissions and is also one of the module leaders in Endocrinology and Reproduction in the new medical curriculum.

IV. INVITED PRESENTATIONS

V. NATIONAL PROFESSIONAL RECOGNITION

Michael R. Ambrose serves as a member of the Secretary of Veterans Affairs Advisory Committee for Former Prisoners of War.

Antonio L. Pacheco serves in the following positions: Member, Communication and Technology Committee, Alabama College of Emergency Physicians (Alabama Chapter).

Frank S. Pettyjohn serves in the following positions: Chairman, Department of Emergency Medicine; Cardiology Consultant to the Federal Aviation Administration; Board of Directors and Past-President, International Academy of Aviation and Space Medicine; Board Member, State of Alabama Medicaid Drug Utilization Review Board; Member, Association of American Medical Colleges (AAMC), Council of Faculty and Academic Societies; Alternate Councilor, American College of Emergency Physicians; Medical Director, Region 6, State of Alabama (Gulf Coast) EMS Region.

Terry N. Rivers serves in the following positions: Member, Emergency Medicine Services Committee, Alabama College of Emergency Physicians (Alabama Chapter).

Michael L. Sternberg serves in the following positions: Vice Chairman, Department of Emergency Medicine; Chairman, Bylaws Committee, American College of Emergency Physicians (Alabama Chapter); Public Relations Committee, American College of Emergency Physicians (Alabama Chapter).

VI. BRIEF SUMMARY OF ACTIVITIES AND PROGRESS

The Department of Emergency Medicine emphasizes excellence in clinical emergency medicine, education of housestaff and medical students, and the ongoing academic development of the faculty. The primary objective is to develop and implement broad-based
educational programs utilizing bedside clinical teaching and advanced educational technologies.

The goal of acquiring a full Residency Program in Emergency Medicine remains a high priority. It is fully supported by the Dean, College of Medicine, Vice President for Health Sciences, and the Faculty. Recruitment of additional faculty continues in order to maintain clinical capabilities, enhance the teaching program, and provide the core Faculty for the Emergency Medicine Residency Program.

**EDUCATION:** The Faculty of the Department of Emergency Medicine continues to emphasize education. The Emergency Medicine Interest Group has been reconstituted to further emergency medicine education. Medical students voluntarily select the emergency medicine rotation as one of the most sought after training sites in the College of Medicine.

The Department of Emergency Medicine provides core faculty for clinical medicine courses in the second year. Michael Sternberg, M.D. directs the teaching activities for the third- and fourth-year medical student elective and the Acting Intern Program. Frank S. Pettyjohn, M.D. serves as Medical Director, School of Continuing Education, EMS Training Program providing education for Physicians, Housestaff, Medical Students and Emergency Medical Technicians/Paramedics.

**RECRUITING PROGRESS:** The recruiting program continues to be active with the goal of obtaining Emergency Medicine Residency Trained and Board Certified Emergency Medicine Physicians to meet the Emergency Medicine Residency Review Committee requirements.

**FACULTY DEVELOPMENT:** Michael L. Sternberg, M.D. serves as Director for the Emergency Medicine Residency Program development. Participation by faculty in national Alabama College of Emergency Physicians Medical Director and leadership courses are considered a priority.

**CLINICAL FACILITIES:** During the 2012-2013 program year, the Department of Emergency Medicine continued to support the operations of the University of South Alabama Medical Center, Level I Trauma Center, Burn Center, Stroke Center and Emergency Department.

The Departmental offices are on the 10th floor of the University of South Alabama Medical Center. These facilities include advanced audiovisual capabilities, digital photographic laboratory, PowerPoint slide development and presentation production areas, and a computer learning system. A simulation laboratory is available in the USA Medical Center. The overall computer support system in the University of South Alabama Medical Center Emergency Department providing ready access to clinical laboratory records, and radiology data. An Electronic Medical Record System (EMR) is scheduled for implementation in 2nd quarter of fiscal year 2014. The ED has updated the computer and viewing screens for teleradiology which provides the same resolution as the Department of Radiology. A
telemedicine capability in the Emergency Medicine Conference Room facilitates educational conferences by national and international experts along with the internal programs of Medicine and Surgery.

Close coordination between the University of South Alabama Medical Center, Level I Trauma Center, and the Children’s and Women’s Evaluation Center has been maintained to provide rapid response for appropriate patient care and transfer requests. Coordination is also maintained between the Department of Obstetrics/Gynecology at the U.S.A. Children’s and Women’s Hospital and the USA Medical Center Emergency Department to provide rapid transfer and treatment for adult patients presenting to Children’s and Women’s Hospital with acute medical or surgical conditions.

**RESEARCH:** The Division of Clinical Research entered the eighteenth year of operation. The primary clinical site is the Moorer Building which is located on the University of South Alabama Medical Center Campus. The program is under the direction of the Principal Investigator, Frank S. Pettyjohn, M.D., with Afisa Halim-Kirosos, M.D., as the Director of the Clinical Research Division. All members of the attending faculty of the Department of Emergency Medicine support the ongoing clinical research studies. Current projects cover a wide range of clinical areas, ranging from anti-hypertensive agent trials, combined hypertension with diabetes trials, and coronary artery diseases trials. Two NIH grant studies have been initiated to include anti-inflammatory trials in coronary artery disease and epidemiologic studies of BP oil spill exposure of personnel. This clinical research provides a unique opportunity, clinical support, and an educational location for the Department of Emergency Medicine.

V. NATIONAL PROFESSIONAL RECOGNITION

Ehab A. Molokhia: Member, Advisory Panel, USMLE CS Standard Setting.

R. Allen Perkins: Peer Reviewer, Family Medicine, American Family Physician. President, Alabama Academy of Family Physicians; President, Alabama Rural Health Association; Member, Alabama Academic Family Medicine Council; Member, Alabama Statewide Area Health Education Centers Advisory Council; Member, Health Care Delivery and Transformation Committee, Association of Departments of Family Medicine; Program Committee Chair, 2014 Annual Meeting, Association of Departments of Family Medicine.

VI. BRIEF SUMMARY OF ACTIVITIES AND PROGRESS

Dr. Ehab Molokhia and Dr. Carol Motley were recognized by the College of Medicine Class of 2013 as Distinguished Faculty.

Dr. Shyla Reddy was honored by the Family Medicine graduating residents as “Clinical Teacher of the Year.”

Dr. Lamar Duffy was promoted to Associate Professor. He continues to be the lead physician for NextGen electronic health record implementation throughout our health care enterprise. A number of practices and EHR specialists across the country are using Dr. Duffy’s NextGen teaching materials, which are being updated to KBM 8.1 presently. He collaborates nationally as a daily participant in the Yahoo NextGen Users’ Online Discussion Group.

VI. BRIEF SUMMARY OF ACTIVITIES AND PROGRESS

Education

The department has continued to receive excellent evaluations from medical students and residents for its educational activities. For 14 consecutive years the Internal Medicine Clerkship has been recognized as the best clerkship for third year medical students. The Class of 2013 again honored the department with this award. Several of the departmental faculty were recognized with the red sash award for their educational efforts and the graduating Class of 2013 again selected a faculty member as the best teacher in the clinical years (Dr. Errol Crook). Department members have been instrumental in developing the new curriculum for the medical school with several serving as the clinical co-director for the modules for the first and second year curriculum.

Our faculty also make important contributions to the education of students in Allied Health and Nursing. For example, Dr. Shannon Tyler serves as the Medical Director for the Department of Physician Assistant Studies in the College of Allied Health Professions where she plays a large role in the education of the PA students. Several of the PA students take clinical rotations in general internal medicine and all of our subspecialty areas.

The department puts forth considerable effort educating its internal medicine residents, internal medicine – pediatric residents, and fellows in Gastrointestinal Diseases, Cardiovascular Disease, and Pulmonary Critical Care. The Grand Rounds Series is well received and is an important educational tool for the community. Several members of the faculty have been recognized as educational leaders in their subspecialty area.

Scholarly Efforts

The department has continued to be productive in scholarly achievements, particularly in the area of publications. Again the Divisions of Gastroenterology, Pulmonary and Critical Care, Cardiology and Nephrology had particularly successful years in the arena. The residents have been active in scholarly activity primarily through case reports and presentations at regional meetings.

There are several clinical trials led by department of medicine faculty. The Division of Gastroenterology continues to have a robust clinical studies portfolio that features studies
in liver disease, advanced endoscopy, inflammatory bowel disease, and preparation for colonoscopy. GI continues to involve its fellows, internal medicine residents and medical students in its research efforts with several of these trainees presenting their work at regional and national meetings.
Cardiology has five multi-center trials underway and has partnered with Dr. William Gerthoffer, Chair Department of Biochemistry, in a translational project funded through the Center for Healthy Communities P-20 Grant. This unique award examines the role of a protein, HSP27, as a unique marker of atherosclerosis and its potential contribution to health disparities seen in cardiovascular disease in African-American populations. The Division of Nephrology and Section of Rheumatology have partnered in trials focused on lupus nephritis. The Division of Pulmonary has continued its partnership with the Center for Lung Biology and has continued clinical, basic and translational studies in pulmonary hypertension. Infectious disease continues its efforts in care of the HIV patient through a grant funded by the Health Resources and Services Administration.

Service

The department continues to deliver excellent clinical service. Dr. Clara Massey, Chief Division of Cardiology, has led a significant effort to revamp cardiovascular services at the University of South Alabama Medical Center with a particular emphasis on cardiothoracic surgical cases. Her work in leading this team has great results with there being no mortalities over the last several months among patients having cardiothoracic surgery. The Division of Gastroenterology has continued to grow its services for advance endoscopy procedures. These advancements have enhanced partnerships with the Mitchell Cancer Institute and are able to address ablations of GI tumors and Barrett's esophagus through endoscope procedures.

Departmental faculty continue to serve on editorial boards, as journal reviewers, on advisory boards, and on grant review panels. The faculty has contributed significantly to the University and the Greater Mobile Community.

V. NATIONAL PROFESSIONAL RECOGNITION

VI. BRIEF SUMMARY OF ACTIVITIES AND PROGRESS

The 41st departmental student, Dr. Andrew E. Byrd completed his dissertation under the direction of Dr. Brewer and received his Ph.D. degree this year. Dr. Byrd is currently a Marketing and Licensing Associate in the Office of Technology Transfer at the University of South Alabama.

At the 50th anniversary celebration for the University of South Alabama, Dr. Joseph H. Coggin Former Chair (deceased) was honored among the USA Faculty Senate 50 Outstanding Faculty Members. Departmental emeritus faculty Dr. Herbert H. Winkler, and Dr. Robert N. Lausch were among the 50 faculty members selected to commemorate the 50 in 50: Five Decades of Research, Scholarly Activity and Creative Work along with Dr. Terrence Tumpay, Senior Microbiologist and Team Leader of the Influenza Division at the Centers for Disease Control, a 1997 departmental graduate of the Ph.D. program.

Drs. Audia, Brett, Burtnick, and Wood, along with colleagues, Drs. Scammell and Schuler in the Department of Comparative Medicine, continue contributing to work towards the completion of the Laboratory of Infectious Diseases (LID) funded by a ARRA $06 grant. This grant provided $14,506,327 for the construction of a 25,800 square foot BSL2/BSL3 laboratory building. The LID is scheduled to be substantially completed by January, 2014.

Dr. Paul J. Brett was promoted from Assistant Professor to Associate Professor on August 15, 2013.

The Department's research programs remain a major focus of faculty activities. Examining the molecular mechanism underlying the pathogenicity of the Biosafety Level 3 (BSL-3) intracellular pathogens Rickettsia prowazekii, Burkholderia mallei and Burkholderia pseudomallei, conducted by Drs. Audia, Brett, Burtnick and Wood, represents a major area of research within the department. The bacterial pathogen group also includes Dr. Foster who continues his work on the physiology and genetics of enteric pathogens. This group is complemented by Dr. Fortwendel who focuses on deciphering the pathogenic mechanisms of the fungal pathogen Aspergillus fumigatus. Drs. Barrington and Brewer, focused on examining the regulation of B cell fate and the unfolded protein response of cells under stress. Despite the problems facing NIH funding, departmental investigators continue to be productive and to actively pursue support for their research efforts.
The Department remains committed to excellence in teaching. All of the Faculty are contributing to the new medical curriculum. Dr. Foster continues to serve as module director for Hematology and Host Defense which involves all of the Microbiology and Immunology faculty. Drs. Foster and Brewer were especially active as effective leaders in course development and organization of departmental contributions to the new curriculum, and in the generation of team-based learning (TBL) exercises. The departmental transition to a TBL approach is incorporated into each module. Dr. Paul Brett was appointed Director (in December 2012) of the Infectious Disease and Host Defense track for graduate students in the Basic Medical Science program. This track was approved by the Graduate Executive Committee at the August 2013 meeting. The track will begin Spring Semester. In the graduate program, faculty members also participated in the interdisciplinary graduate level courses IDL 580 and IDL 581.

Dr. Barrington continues to work with the University of South Alabama Lions Club to develop community interest in supporting research. This resulted in the acquisition of an x-irradiator, a needed addition to the research capabilities within the College of Medicine.

Dr. Brewer completed his first year as Director of the Basic Medical Science Interdisciplinary Graduate Program. He represented the University of South Alabama’s Interdisciplinary Graduate Program in Basic Medical Sciences at the Group for Research Advancement and Training (GREAT) in Nashville Tennessee. Dr. Brewer left the department in May 2013 to accept a position as Chair, Department of Molecular and Cellular Sciences, College of Osteopathic Medicine, Liberty University, Lynchburg, Virginia.

Dr. Mary Burtnick was accepted as a participant in the AAMC Early Career Women Faculty Professional Development Seminar held July 13-16, 2013 in Englewood, CO. This program provides an introduction to the knowledge and skills needed to follow a path to leadership in academic medicine for physicians and Ph.D. scientists holding medical school appointments, and are in the early stages of leadership positions within their discipline, department or institution. Acceptance to this program is highly competitive.

The Department hosted three scientists for the Distinguished Scientist Seminar Series who presented outstanding seminars and met with the departmental faculty and students. Troy D. Randall, Ph.D., J. Claude Bennett Professor of Medicine, Department of Medicine, Division of Clinical Immunology and Rheumatology, University of Alabama at Birmingham, Birmingham, Alabama presented a seminar entitled “Local immunity to tumors and other antigens in the peritoneal cavity.” David Askew, Ph.D., a professor in the Department of Pathology and Laboratory Medicine, University of Cincinnati, Cincinnati, Ohio presented a seminar entitled “Protecting the lung from Aspergillus fumigatus infection: new concepts in fungal pathogenesis and host defense.” David H. Walker, M.D., The Carmage and Martha Wall Distinguished University Chair in Tropical Diseases, Professor and Chairman, Department of Pathology, Executive Director Center for Biodefense and Emerging Infectious Diseases, UTMB, Galveston, Texas presented a seminar entitled “Mechanisms of immunity to Rickettsia and implications for vaccine development.”

V. NATIONAL PROFESSIONAL RECOGNITION

Bassam A. Bassam: Member, Neuromuscular Update Committee, American Association of Neuromuscular and Electrodiagnostic Medicine (AANEM); Supervisor, American Board of Electrodiagnostic Medicine annual board examination; Member and Guidelines Reviewer, Network Subcommittee, American Academy of Neurology; Member, Neuromuscular Section, American Academy of Neurology; Ad Hoc Reviewer, Muscle and Nerve Journal, Clinical Neuromuscular Journal, Headache Journal and Frontiers in Movement Disorders; Member, Grant reviewer panel, FDNOffice of Orphan Products Development; Member at Large, Alabama Quality Assurance Foundation.
Steve M. Cordina: Member, American Heart Association; Member, American Stroke Association; Member, American Academy of Neurology; member, Society of Neurointerventional Surgery; Member, Society of Vascular and Interventional Neurology; Member, Neurocritical Care Society; Member, Medical Association of Malta.

Daniel D. Dees: Member, American Academy of Neurology; Member, Movement Disorders Society.

Christopher Eckstein: Member, American Academy of Neurology; Member, National Multiple Sclerosis Society; Member, Clinical Advisory Team Committee, National Multiple Sclerosis Society.

Paul Maertens: Editorial Board Member, *Journal of Neuroimaging*; Member, Examination Committee of the Society of Neuroimaging; Member, ASN Program Committee; Member, American Society of Neuroimaging; Member, Membership Committee, American Epilepsy Society; President, Southern Pediatric Neurology Society.

Dean K. Naritoku: Scientific Committee, American Epilepsy Society; Task Force on Brain Stimulation, American Epilepsy Society; Board Member, American Board of Clinical Pharmacology; Board Member, J. Kiffin Penry Minifellowship Program; Member, American Academy of Neurology, American Epilepsy Society, American Society of Clinical Pharmacology and Therapeutics. Best Doctors in America® 2007-2012; Editorial Board Member, Neurology Research.

Juan G. Ochoa: Member, Editorial Board of the Journal Pediatric Neurology; Member, American Academy of Neurology, American Epilepsy Society, American Clinical Neurophysiology Society.

VI. BRIEF SUMMARY OF ACTIVITIES AND PROGRESS

Organized and revised the Third Year Medical Student Neurology Clerkship structure, updated the clerkship goals and objective competency-based curriculum to meet the LCME requirements and the AAN Consortium for Neurology Clerkship recommendations, implemented team based learning (TBL) and interactive teaching process, and worked with the neuroscience team to integrate basic neuroscience.

Formal recognition of teaching excellence by the medical students is evidenced by seven out of seven faculty receiving the "Red Sash" award from the 2013 graduating class of medical students.
A record number of students entered neurology from the class of 2013. Seven of 73 students went into adult or pediatric neurology.

Dr. Olivier Darbin participated in a joint project in Neurology USA/System Physiology NIPS on a closed-loop system for Deep Brain Stimulation in MPTP-NHP. He is an editorial member for four peer reviewed journals and has participated in the development of a new model for basal ganglia dysfunctions in movement disorders.

Dr. Daniel Dees has established a regional movement disorders program, which includes a botulinum toxin clinic and continues to move forward with the development of the deep brain stimulation program at USAMC.

VI. BRIEF SUMMARY OF ACTIVITIES AND PROGRESS

The Department of Neurosurgery continues to have a busy clinical practice covering the USA Medical Center, Children's and Women's Hospital, The Mitchell Cancer Institute, and The Mobile Infirmary Medical Center. Dr. Anthony Martino continues as department Chairman. He is actively involved clinically at all the locations. With the collaboration between UAB and MCI initiated this year he has started to participate in the Neurospore Group. This group of UAB and MCI physicians currently review brain tumor protocols on a monthly basis and can enroll the appropriate patients in the various studies. The neuro-oncology clinic continues to support the cyberknife program at the MCI. Dr. Martino has also helped organize The Oncology Outlook Meeting that took place at The Grand Hotel in March 2013.

The departments teaching activities continue with the weekly Neuroradiology Meeting, participation in the second year Neuroscience course, and clinical electives in the IIIrd and IVth year. The IVth year elective remains a popular elective for many students entering neurology or neurosurgery and those wishing to expand their neuroscience experience.

We currently have two mid-level providers that provide support daily with hospital rounds and they also have an active office clinic. They independently see patients that require post-operative wound care and the initial management for back and neck pain. They also participate in the concussion management program at various local high schools. They assist in per-season neuropsychological testing and post trauma assessment and clearance for continued play.

The collaborative clinical research effort with the Department of Surgery, Division of Trauma has expanded into a second study looking at micro RNA in the CSF of trauma patients. This has also been submitted as part of a larger grant with the Department of Surgery.

In conjunction with the Department of Neurology, The Deep Brain Stimulation Program is being developed and will hopefully enroll patients this year. As we collaborate on more programs with neurology and surgery we have planned to move our academic offices to the 10th Floor of the Medical Center this coming year.

Dr. W. George Rusyniak continues to lead the epilepsy program in conjunction with Dr. Ochoa. He lectures to medical students and residents on neuroanatomy and neurosurgical case management.

V. NATIONAL PROFESSIONAL RECOGNITION
David Lewis serves as Secretary to the national organization, Central Association of Obstetrics and Gynecology (CAOG).

Botros Rizk is a member of the Scientific Advisory Committee of the Mediterranean Society for Reproductive Medicine. He has been invited guest speaker for MSRM, Egyptian Fertility Society, McGill International Symposium and Pre-congress Course for the Royal College of Obstetricians and Gynecologists. He has been an Ad hoc reviewer for 14 years to the Journals of Fertility and Sterility, Human Reproduction, Molecular Human Reproduction, Middle East Fertility Society, Reproductive Biomedicine Online, American Journal of Obstetrics and Gynecology and is on the Editorial Board of the Middle East Fertility Society Journal Publication and Chairman of the American Society for Reproductive Medicine International Membership Committee.

VI. BRIEF SUMMARY OF DEPARTMENT ACTIVITIES AND PROGRESS

The Department's Annual CME program was held at the Daphne Civic Center April 11 & 12, 2013. It was the department’s 22nd Annual Conference in Obstetrics and Gynecology. Outside speakers were Baha M. Sibai, MD University of Texas Medical School, Houston, Texas, James Unger, MD, Associate Professor, LSU, Shreveport, LA and Glenda Dickerson, MS, RN, Brookwood Medical Center, Birmingham, AL. The meeting was widely supported and attended by physicians, nurse practitioners, nurse midwives and obstetric nurses from a large geographic area.

Dr. Susan L. Baker, Director of the Division of Maternal Fetal Medicine, serves as a clinician with an emphasis on substance abuse issues with pregnant women.

Dr. Frankie Bodie serves as generalist and is the director of the Center for Women's Health, and coordinates the faculty call schedule.

Dr. John LaFleur serves as generalist serves on the Executive Committee and is Chairman of the OB/GYN Committee at USACW. Dr. LaFleur was awarded the Red Sash, by the COM Class of 2013, to wear at their graduation in May.

Dr. Botros Rizk is a member of Department of OB/GYN Laboratory QA Committee, Chairman 1999-Present, Medical and Scientific Director of the University of South Alabama IVF Program.

Dr. Craig Sherman serves as the Program Director and as Medical Director for the Women’s Center. He received the Red Sash award from COM Class of 2013. Dr. Sherman is Chair of the Medical Executive Committee of USACW. He also serves on the following USACW committees, OB/GYN Performance Improvement, Pediatrics and Neonatology, and Radiology. He serves on the USA Hospital Credentials Committee and the Combined Medical Executive Committee, and the Advisory Committee, Alabama Section, ACOG.
Dr. Steven Varner continues in his capacity as Director of the Division of Gynecology and maintains the Vulvar clinic.

Dr. Michael Finan has a dual appointment with the Department of OB/GYN and the Division of Gynecologic Oncology at the Mitchell Cancer Center. He is Chief of Gynecologic Oncology for the OB/GYN Department. Dr. Finan serves on the Society of Gynecologic Oncologists Quality and Outcomes Committee and he holds active leadership role in Early Detection Research Network (EDRN) and the National Cancer Institute (NCI). He is on the Membership Committee of the Society of Pelvic Surgeons. He is on the PhD Dissertation Committee for USA MCI. Dr. Finan was listed by “U.S. News and World Report” as one of “America’s Top Doctors” for 2013., Castle Connelly: Best Doctor 2013, Best Doctors in America 2013, National Patient Satisfaction Award: 2013, GO Run Planning Committee and Police Surgeon, Mobile Police Department Mardi Gras 2013.

Dr. Rodney Rocconi has a dual appointment with the Department of OB/GYN and the Mitchell Cancer Center.

Dr. Jennifer Scalici has a dual appointment with the Department of OB/GYN and the Mitchell Cancer Center.

Doctors Finan, Rocconi and Scalici teach GYN Oncology to the OB/GYN residents for a total of six months during their 4 year residency.

VI. BRIEF SUMMARY OF ACTIVITIES AND PROGRESS

The Department of Orthopaedic Surgery continues to be engaged both clinically and academically. In the last year there have been 7 published manuscripts in nationally recognized journals, and 8 published abstracts. In addition, there have been 38 presentations at regional and national meetings. A number of our faculty received national recognition including Dr. Jorge Alonso who is a faculty member of the AO North America and serves on the Riverside Military Academy Board of Trustees. Dr. Albert Pearsall is a Council Member on the Tissue Advisory Council for the LifeLink Foundation, Inc. and is a member of the Publications Committee at the American Orthopaedic Society for Sports Medicine. Dr. Mark Perry is a member of the AAOS Resolutions Committee and is on the Editorial Board of the Patient Information website, www.footeducation.com. The Department of Orthopaedic Surgery has three residents in PGY V, PGY IV, III, II and I years. All of our residents have passed their written boards.
This year we graduated Jared Burkett, M.D., Raul Curiel, M.D. and Grant Shell, M.D. Jared Burkett, MD accepted a Hand Fellowship position at the University of Mississippi in Oxford, Mississippi; Raul Curiel, MD, accepted a Sports Medicine Fellowship position in Phoenix, Arizona; and Grant Shell, MD, accepted a Foot & Ankle Fellowship position at the University of Alabama at Birmingham in Birmingham, Alabama.

Andrea G. Kahn: Executive Committee, Alabama Association of Pathology; Ambassador, United States and Canadian Academy of Pathology.

Elizabeth A. Manci: Board of Directors of the Gulf Coast Regional Chapter of the American Red Cross; Past-President, Medical Society of Mobile County; Counselor, Medical Association of the State of Alabama, District One; President and Finance Committee Member of the Mobile Medical Museum; Member, planning committee of the Drug Education Council.

Kelly Roveda: Councilor AOA chapter.

J. Allan Tucker: Member, American Medical Association/Speciality Society Resource-Based Relative Value Scale Update Committee (RUC) (Vice Chair, RUC Administrative Subcommittee, Chair, RUC Global Period Workgroup, Chair, RUC Financial Disclosure Review Workgroup); Treasurer, American Registry of Pathology; Member, Economic Affairs Committee of the College of American Pathologists and Member of the CPT/RUC Workgroup; Member, Graduate Medical Education Committee of the College of American Pathologists; Secretary and Treasurer, History of Pathology Society; Treasurer, Internation Academy of Pathology; Treasurer, Society of Ultrastructural Pathology; Delegate, American Medical Association (representing United States and Canadian Academy of Pathology); Member, Veterans Affairs Electron Microscopy Ad Hoc Review Group; Editorial Board: *Annals of Clinical and Laboratory Science*; Associate Editor, *Ultrastructural Pathology*; Editor-in-chief, *Journal of Pathology Research*.

VI. BRIEF SUMMARY OF ACTIVITIES AND PROGRESS

After retiring from the Alabama Department of Forensics Sciences, the department was very fortunate to have the continued input and educational participation of Dr. LeRoy Riddick, who has been serving as an adjunct professor in the department. Concluding his remarkable career, Dr. Riddick retired this year. The department wishes him well.

Dr. Carole Boudreaux completed a highly successful stint as the assistant dean for graduate medical education, and has returned full time to the department. Dr. Javier Laurini was appointed as director of immunohistochemistry.

Four residents completed the program this year. Dr. Blythe Bowman has entered a dermatopathology fellowship at the University of Vermont. Dr. Kalli Faulkner has begun a hematopathology fellowship at the Medical University of South Carolina. Dr. Oscar Roncal is undertaking a surgical pathology fellowship at the University of Texas Medical Branch. Dr. Jennifer Guthrie has begun work as a medical director for a pharmaceutical company. The department enjoyed another highly successful recruiting year, with four new residents joining the department: Dr. Katrina Bowers from Des Moines University College, Dr. Erin Bascom from Florida State University, Dr. Valeria Dal Zotto who graduated from the University of Buenos Aires and has been working as a staff pathologist in the Honduras, and Dr. Sounick Haldar who graduated from N.K.P. Salve Institute of Medical Sciences and obtained a masters in biology (neuroscience and
molecular biology) from Texas Woman’s University, and just completed a year in research at Yale University.

The Betsy D. Bennett award for outstanding teaching by a resident went to Dr. Rocky Adams. The residents’ faculty recognition award went to Dr. Javier Laurini, and their staff recognition award to Ms. Debbie Buck. Dr. Tucker was awarded with a Red Sash at graduation and gave the honors convocation address. Pathology was selected by the graduating class as the best basic science course, and diagnostic electron microscopy was selected as the best fourth year elective. The William A. Gardner, Jr., Award for an outstanding pathology performance by a graduating medical student went to Ms. Missia Kohler.
2012-2013
Summary of Scholarly Activities
Department of Pediatrics

I. PUBLISHED JOURNAL ARTICLES, BOOK CHAPTERS, AND PATENTS

Gomella TL. Blood component therapy. In: Gomella TL, Cunningham MD, Eyal FG,

Whitehurst RM Jr. Rh incompatibility. In: Gomella TL, Cunningham MD, Eyal FG,

II. PUBLISHED ABSTRACTS

Calderon C Jr, Martinez J, Ponnambalam A. Recurrent rhabdomyolysis and pancreatitis

III. PUBLISHED BOOKS
IV. INVITED PRESENTATIONS

Custodio H. Invited speaker. Pediatric tuberculosis. Department of Health Annual TB Update; 2012 Oct 3; Birmingham, AL.

Custodio H. Invited speaker. Influenza. University of Mobile; 2013 Feb 27; Mobile, AL.

Gremse DA. Invited speaker. The ups and downs of GERD. USA Med School Café; 2013 Apr 16; Mobile, AL.

Gremse DA. Invited speaker. Acid reflux. USA Medical Alumni Association Annual Alumni Weekend; 2013 Jun 1; Orange Beach, AL.

Hamm CR Jr. Invited speaker. Life in academic medicine. USA Alpha Epsilon Delta Pre Health Honor Society; 2012 Nov 8; Mobile, AL.

Howell DL. Invited speaker. Difficult cases: contact dermatitis. American Academy of Allergy, Asthma and Immunology Annual Meeting; 2013 Feb 22; San Antonio, TX.

Howell DL. Invited speaker. Skin allergy: the itchy rash. 2013 AAP Spring Meeting and Pediatric Update; 2013 May 5; Destin, FL.

Howell DL. Invited speaker. Primary immunodeficiency for the general pediatrician. 2013 AAP Spring Meeting and Pediatric Update; 2013 May 5; Destin, FL.

Preud’Homme D. Invited speaker. Team based learning – train the trainer. Mobile County Department of Human Resources; 2012 Oct 24; Mobile, AL.

Preud’Homme D. Invited speaker. Atherosclerosis. Springhill College; 2012 Nov 26; Mobile, AL.

Roberson-Trammell K. Invited speaker. Childhood obesity. Friendship Missionary Baptist Church; 2013 Feb 10; Mobile, AL.

Siddiqui AH. Invited speaker. An overview of blood transfusions. 3rd Annual Advancement in the Care of Pediatric Cancer & Blood Disorders Symposium, University of Alabama; 2012 Oct 10; Birmingham, AL.
Swingle H. Invited speaker. Autism spectrum disorders: causes and treatment. AAP 2013 Annual Meeting & Fall Pediatric Update; 2013 Sep 29; Birmingham, AL.

Trimm F. Invited speaker. Faculty development for the new requirements. Association of Pediatric Program Directors Fall Meeting; 2012 Oct 5; Arlington, VA.

Trimm F. Invited speaker. Build a better doctor: using the milestones to enhance performance through remediation and enrichment. 2013 ACGME Annual Education Conference; 2013 Mar 2; Orlando, FL.

Trimm F. Invited speaker. The ABCs of curriculum development. Association of Pediatric Program Directors Spring Meeting; 2013 Apr 10; Nashville, TN.

Trimm F, Estrada B. Invited speakers. SNIPPETS: tailoring efficient, effective faculty development. Association of Pediatric Program Directors Spring Meeting; 2013 Apr 12; Nashville, TN.

Trimm F. Invited speaker. Pediatric residency accreditation: changes for the good? Board of Directors, American Academy of Pediatrics; 2013 May 17; Chicago, IL.

Vashishtha N, Ponnambalam A. Invited speakers. Gastric carcinoid – a rare tumor in pediatric population. NASPghan Annual Meeting; 2012 Oct 18; Salt Lake City, UT.

Whitehurst RM Jr. Invited speaker. Neonatal abstinence syndrome. Providence Hospital; 2013 Feb 21; Mobile, AL.

Wilson F. Invited speaker. No patient left behind: transitioning sickle cell disease patients from pediatric to adult. Hughes Spalding and Scottish Rite Hospitals; 2013 Jan 24; Atlanta, GA.

Wilson F. Invited speaker. Be sickle smart-take control of your future: living with sickle cell disease. Upstate Golisano Children’s Hospital, State University of New York; 2013 May 22; Syracuse, NY.

Wilson F. Invited speaker. Current considerations in the management of patients with sickle cell disease. University of Oklahoma Children’s Hospital; 2013 May 29; Oklahoma City, OK.

V. NATIONAL PROFESSIONAL RECOGNITION

Kimberly Cole: Member, Alabama Baby Coalition.

Rosina Connelly: Co-leader/workshop presenter, "Making learning fun for all: working with learners" at the April 2013 Association of Pediatric Program Directors/COMSEP Combined Annual Meeting in Nashville, TN.

LaDonna Crews: Board Member, American Academy of Pediatrics, Alabama Chapter Residency Program Representative. MASA Alabama Chapter AAP Representative.

Benjamin Estrada: Elected Faculty Member, USA Chapter of the Arnold P. Gold Humanism in Medicine Honor Society, AOA Medical Society; Member, COMSEP Curriculum Task Force; USACOM Assistant Dean for Medical Education; Institution Representative, Committee on Medical Student Education in Pediatrics (COMSEP); Institutional Representative, Southern Society for Pediatric Research; Reviewer. *Pediatric Infectious Diseases Journal, Infectious Diseases in Clinical Practice.*

Sheryl Falkos: Medical Director, Pediatrics for Baptist LifeFlight; Member, Alabama Child Death Review; Advisory Board, Penelope House.

Cristina Gavrilita: Member, Alabama Baby Coalition.

David Gremse: Director, American Board of Pediatrics and the American Board of Pediatrics Foundation; Member, General Pediatrics Examination Committee Group B, American Board of Pediatrics; Member, Subboard of Pediatric Gastroenterology Examination Committee, American Board of Pediatrics; Member, Chair, Finance Committee, North American Society for Pediatric Gastroenterology, Hepatology and Nutrition (NASPGHAN); Chair, Nominating Committee, NASPGHAN; Member, Ethics Committee, NASPGHAN; Editorial Board, *Pediatric Drugs,* Reviewer. *Journal of Pediatric Gastroenterology and Nutrition, Pediatrics, Digestive Diseases and Sciences;*

Druhan Howell: Secretary/Treasurer, Alabama Society of Allergy & Immunology. Committee Member Representative, American Academy of Allergy, Asthma & Immunology, New Allergist/Immunologist Assembly Section.

Grace Hundley: Poster Judge, Student and Associate Abstract Competition, Alabama Chapter, ACP Annual Meeting, Point Clear, AL; Member, Alabama Chapter Governor's Council, American College of Physicians (ACP).

Anne-Marie Kaulfers: Board Member, Southeastern Diabetes Education Services;
Reviewer: The Journal of Clinical Endocrinology & Metabolism.

Jessica Kirk: Medical Director, Child Advocacy Center; Coordinator and Medical Home Subcommittee Chairperson, American Academy of Pediatrics (AAP) SOMSRFT District X; CATCH Facilitator, State of Alabama; AL Chapter Young Physician Co-Chairperson of the AAP; Member, AAP Council on Community Pediatrics; Nominating Committee, SOYP.

Jose Martinez: Presented the Medicine and Science Award by the Hispanic American Business Association of the Gulf Coast.

Anand Ponnambalam: Member, Motility Committee of the North American Society for Pediatric Gastroenterology, Hepatology and Nutrition (NASPGHAN); Member, NASPGHAN Professional Developmental Committee; Course Conductor, North American Society for Pediatric Gastroenterology, Hepatology and Nutrition Annual Conference.

Daniel Preud’Homme: Member, National Lipid Association Education Committee.

Katrina Roberson Trammell: Medical Director and Board of Directors, Gulf Regional Child Care Management Agency, Inc. (GRCMA) Gulf Regional Early Childhood Services; Representative, MASA Alabama Chapter, AAP.

Hanes M. Swingle: Member, Faculty Senate’s 50 Outstanding Faculty; Member, Executive Committee, Alabama Interagency Autism Coordinating Council (AIACC); Board of Directors, Autism Society of Alabama; Board of Directors, Glenwood Autism and Behavioral Health Center, Birmingham; Advisory Board, Learning Tree, Inc.; Chair, Diagnostic Clinics Workgroup of the AIACC Standards of Practice Committee; Reviewer: Journal of Developmental-Behavioral Pediatrics, Maternal and Child Health Journal, the Pediatric Academic Society Annual Meeting, Society for Developmental-Behavioral Pediatrics Annual Meeting.

R. Franklin Trimn: Robert S. Holm Leadership Award, Association of Pediatric Program Directors; Inducted Faculty Member, Alpha Omega Alpha Alabama Beta Chapter; Co-Chair, AAP PediaLink Resident Advisory Committee; Co-Chair, Association of Pediatric Program Directors LGBTQ Pediatric Education Group; Board of Directors, Society for Developmental and Behavioral Pediatrics; Consultant, AAP Mental Health Task Force; Director and Chair of Council, Association of Pediatric Program Directors LEAD (Program Director School); Member, Accreditation Council Graduate Medical Education (ACGME) Pediatric Residency Review Committee; Member, Pediatric Academic Societies Program Committee, Co-Chair for Developmental-Behavioral Pediatrics Invited and Submitted Science; Chair, AAP Committee on Pediatric Education (COPE); Curriculum Across the Continuum Task Force Leader, SDBP Education Committee; Co-Editor, American Academy of Pediatrics Developmental-Behavioral Pediatrics Self-Assessment; Editorial Board: Journal of Pediatrics; Reviewer: Journal of Developmental & Behavioral Pediatrics, Academic Medicine, Journal of Graduate Medical Education, Journal of the Academic Pediatric Association.
Rosa Vidal: Board of Directors, Ronald McDonald House.

Felicia Wilson: President, Alabama Sickle Cell Oversight & Regulatory Commission; Member, State of Alabama Newborn Screening Advisory Committee; Co-Chair, Hemoglobinopathy Subcommittee; Member, Alabama Comprehensive Cancer Control Coalition and Member, Prevention, Early Detection Subcommittee; Laboratory Medical Director and Board of Directors, Sickle Cell Disease Association of American, Mobile Chapter; Member, State of Alabama Hemophilia Advisory Committee; Research Mentor for Fellows, American Society of Pediatric Hematology/Oncology; Medical Consultant, HRSA Newborn Screening Case Definition Project.

Michael Zayck: Member, Regional IV Perinatal Advisory Council; Member, State Perinatal Advisory Committee, Member, Fetal Infant Mortality Review Data Subgroup Committee; Reviewer: Pediatrics, The Cerebellum.

VI. BRIEF SUMMARY OF ACTIVITIES AND PROGRESS

The Department of Pediatrics was delighted to welcome back Dr. Omar Sanchez, resident graduate, to USA as Assistant Professor in the Division of Pediatric Critical Care Medicine. Dr. Sanchez completed his Pediatric Critical Care Medicine fellowship at Miami Children’s Hospital. The department also welcomed back Dr. Brandy Merritt, an alumnus of the USACOM Class of 2007, to the department as Assistant Professor in the Division of Pediatric Critical Care and as a Pediatric Hospitalist in the Division of General Pediatrics. Dr. Merritt completed her Pediatric Critical Care fellowship at the University of Chicago. Dr. Maria Renee Roca Garcia was appointed at the rank of Assistant Professor as a Pediatric Hospitalist in the Division of General Pediatrics after completion of her Pediatric Residency at Miami Children’s Hospital. Dr. Sophia Goslings completed her duties as Pediatric Chief Resident and also joined the department as an Assistant Professor to become a Pediatric Hospitalist the Division of General Pediatrics.

Drs. Rosina Connelly, LaDonna Crews, Benjamin Estrada, Fabien Eyal, David Gremse, Druhan Howell, Grace Hundley, Hamayun Imran, Ihab Jubran, Jessica Kirk, Jose Martinez, Keith Peevy, Cindy Sheets, Hanes Swingle, Franklin Trimm and Felicia Wilson were recognized by the USACOM Class of 2013 as Distinguished Faculty at the Honors Convocation. The nineteenth recipient of the Hollis J. Wiseman Award for Excellence in Pediatrics during the Pediatric Clerkship for the Class of 2013 was Sonia Savani. Six of the graduating medical students in the USACOM Class of 2013 chose residencies in Pediatrics or combined Medicine-Pediatrics. Of the pediatric housestaff completing residency training in 2013, five entered private practice, seven entered into fellowship training, and one remained in the department as Chief Resident. Both of the graduating Medicine-Pediatrics residents entered private practice. Eleven new first year residents entered the pediatric residency program, and two first-year residents entered the combined Medicine-Pediatrics Residency Program. Dr. Tiffany Petty was named Chief Resident for the 2013-2014 academic year.
The scholarly activities by the faculty of the Department of Pediatrics this year included 24 original articles and 30 published abstracts. Departmental faculty were active in mentoring pediatric residents in clinical research. There were 25 abstracts presented at regional and national meetings by pediatric residents who were the first authors with senior authorship by members of the pediatric faculty.

Patients were transferred into the new Pediatric expansion of USA Children’s and Women’s Hospital in the Fall of 2013. The Department of Pediatrics reached out to community physicians to increase referrals to USA Children’s and Women’s Hospital. The inroads made from these efforts resulted in an 8.5% increase in patient days in the Pediatric Unit at CWH.

Faculty members in the Department of Pediatrics are making innovations in undergraduate and graduate medical education of USACOM students and residents. Dr. Benjamin Estrada revised the Pediatric Clerkship to include Team Based Learning (TBL) exercises among other changes that resulted in an increase in the mean Pediatric Mini-Board performance of our students from the 45th to the 57th percentile. Dr. Estrada demonstrated a correlation between medical school TBL performance and mini-board scores that may prove useful as a way of identifying students who may benefit from additional instruction. Dr. Franklin Trimm’s position as Vice-Chair of the Accreditation Council for Graduate Medical Education (ACGME) Pediatric Residency Review Committee benefits USACOM through his insight into upcoming requirements in the Next Accreditation System. USA is among the first of Pediatric Residency Programs to implement evaluation of pediatric resident performance based on Pediatric Milestones ahead of the mandatory reporting deadline. In addition, Dr. Trimm was selected to participate in a group of Pediatric educators to create a list of Entrustable Professional Activities for residents linked to the Pediatric Milestones.

In providing patient care to children in our region, Department of Pediatrics faculty play a vital role in the outcomes of pediatric patients who receive care at USA Children’s and Women’s Hospital. The Hollis J. Wiseman Neonatal Intensive Care Unit ranks in the top 1% nationally in survival of premature infants less than 25 weeks gestation. Neonatology faculty authored eleven chapters in the 7th Edition of Neonatology – Management, Procedures, On-Call Problems, Diseases, and Drugs, a text for which Dr. Fabien Eyal was a co-editor. A quality improvement project emphasizing competency in communication was conducted by pediatric residents during rotations at CWH improving written documentation and connecting with community physicians. Partly due to this increased outreach, the pediatric unit at CWH increased the number of admissions by 20%.

Major goals for the coming year include: 1) development of patient care and medical education activities of Pediatric Hospitalists at Children’s & Women’s Hospital, 2) expansion of the Pediatric Critical Care Division including the Pediatric Sedation Service, and 3) quality improvement activities to include QI projects in ambulatory pediatrics.

VI. BRIEF SUMMARY OF ACTIVITIES AND PROGRESS

The Department of Pharmacology hosted visits from three scientists who participated in the Distinguished Scientist Seminar Series: Dr. Luis Fernandez, Associate Director, Department of Surgery, Division of Transplantation, University of Wisconsin, Madison, WI presented “Islet Transplantation: What Have We Learned in the Past 10 Years?” on Thursday, November 1, 2012. Dr. Loren E. Wold, Principle Investigator, Center for Cardiovascular & Pulmonary Research, Research Institute at Nationwide Children’s Hospital, Assistant Professor, Department of Pediatrics & Adjunct Professor, Department of Physiology, Ohio State University, Columbus, OH presented “Environmental Triggers of Cardiovascular Disease” on Thursday, January 24, 2013. Dr. Lorraine Ware, Associate Professor, Departments of Medicine, Pathology & Microbiology & Immunology, Vanderbilt University Medical Center, Nashville, TN presented “Cell-Free Hemoglobin and the Pathogenesis of Acute Lung Injury: A Tale of Bad Blood” on Thursday, April 4, 2013.

Three students earned their doctoral degrees from the Department of Pharmacology and the Center for Lung Biology. Dr. Abdallah Alzoubi defended his dissertation entitled, “Dehydroepiandrosterone Restores Right Ventricular Structure and Function in Rats with Severe Pulmonary Arterial Hypertension” on March 8, 2013. Dr. Masahiko Oka served as his major professor. Dr. Alzoubi returned home to Jordan to pursue academic medicine as an Assistant Professor of Pharmacology at Jordan University of Science and Technology in Irbid, Jordan. Dr. Luai Z. Hasoun’s defense was on May 23, 2013. His dissertation was entitled, “Folates in Human Skin.” Dr. June E. Ayling served as his major professor. Dr. Hasoun is an Assistant Professor of Pharmacy and Medical Sciences at German Jordanian University in Amman, Jordan. Dr. Heba Khader defended her dissertation, “The Effect of Increasing Glucose Uptake on Oxidative Stress and Endothelial Cell Function”, on July 9, 2013. Dr. Brian Fouty served as her major professor. Dr. Khader has accepted the position of Assistant Professor of Pharmacy at Zarqa University in Jordan.

Dr. Mark Gillespie participated in the Alabama Launchpad Startup Competition’s final pitch phase at Evonik Degussa in Birmingham, AL on May 3, 2013. Dr. Gillespie has partnered with one of the first biotech companies to be launched along the Gulf Coast, Exscien, led by Steve and Christine Cumbie, to support the development of a new drug to repair damage to mitochondrial DNA to prevent and reverse acute lung injury. Exscien was awarded more than half of the total award divided between the three final Launchpad competitors.

V. NATIONAL PROFESSIONAL RECOGNITION

Dr. Byron G. Brogdon is a member of the Advisory Board of Viritopsy Foundation, Berne, Switzerland; Dr. Brogdon serves as member of the National Institute of Justice/Forensic Science Foundation Research Grant Committee. He is a member of the Forensic Science Foundation Research Committee and a referee for the Forensic Science Foundation Acorn and Lucas Grants. Dr. Brogdon serves on the Historical Committee of the General Section of the AAFS. He is on the Board of Directors of the Senior Radiological Section of the American Skeletal Society and was chairman for the 2011 meeting. He is an evaluator of graduate degree thesis for the University of Western Australia. There is a film panel named in the honor of Dr. Brogdon at the Southern Radiological Conference annual meeting and the Brogdon Panel is an annual event at the meeting of the American Alliance of Academic Chief Residents in Radiology. To add to Dr. Brogdon’s accomplishments for this past year, Dr. Brogdon was Keynote speaker at the initial meeting of the International Society for Forensic Radiology and Imaging where he became both a charter member and the first honorary member. He has contributed expert testimony to numerous civil and criminal cases across the United States. Dr. Brogdon served as a judge for the Emerging Forensic Scientist Award at the AAFS Annual Meeting. He reviews manuscripts and abstracts for the Journal of Forensic Sciences and Forensic Science International. He is Patron of the International Association of Forensic Radiographers.

Dr. Brad A. Steffler serves on the Economics Committee/Work Group of The Society of Interventional Radiology. He serves as the Carrier Advisory Committee representative in Alabama for Interventional Radiology for the Society of Interventional Radiology.
VI. BRIEF SUMMARY OF ACTIVITIES AND PROGRESS

Dr. Byron G. Brogdon conducts two to three Orthopaedic conferences as well as two to three Interesting Case conferences per month for the Radiology Residents although he is a Distinguished Emeritus Professor at the University. He serves as a consultant for cases within the University. Dr. Brogdon finished work on his sixth book, cited above. He attended his 60th reunion of his class graduating from the University of Arkansas School of Medicine in 1952.

Dr. M. Suzy Figarola has been appointed Vice Chair and Residency Program Director. She serves as Chair of the Radiology committee at USA Children’s & Women’s Hospital; Member, USA C&W Medical Executive Committee and Surgery Medical Staff Committee; Chair, Internal Radiology Residency Review Committee; Member, Graduate Medical Education Committee; Member, Faculty Committee on Appointments, Promotions and Evaluations (FCAPE); Member, Committee on Committees; and Member, Radiology Investigator Children’s Oncology Group.

Dr. Donald E. Herbert (Emeritus) continues to serve as a statistical consultant to several faculty members in the College of Medicine. He continues to serve as a reviewer for the journal Medical Physics. He is completing a monograph that will introduce medical physicists to the mathematics (finite mixture models, Bayesian meta-analysis, nonlinear stochastic delay differential equations) of complex systems and “personalized medicine.” The current draft of the monograph is 152 pages (82,788 words) in length. He is Emeritus Professor in the Department of Radiology.

Dr. Samuel A. McQuiston serves as the Director of Courses for COM Students interested in Radiology as a profession and as a part of their electives. Dr. McQuiston provides CME lectures on Thoracic Radiology and he also reviews cases of interest to residents. Dr. McQuiston gave 1st Year Orientation to 2012 incoming Radiology Residents. Dr. McQuiston served as a member of USAMC Professional Improvement Committee. Dr. McQuiston serves as a member on the Curriculum Committee (CUR) and the Continuing Medical Education Committee (CME), as well as a member of the Radiology Residency Review Committee.

Dr. Yasmeen A. Qureshi serves as a member of the Resident Interview/Selection Committee for the Department of Radiology. She also as a member on the Trauma/Burn Q/A Committee for the University. Dr. Qureshi gives CME lectures on Mammography. Dr. Qureshi continues to promote Breast MRI Service. Dr. Qureshi is also involved in Women’s Imaging and programs including U/S guided and MRI guided breast biopsies. To add, she continues to be involved in INTACT Biopsy device for breast masses treated non-operatively. She serves on the Biomedical Environment and Diversity Committee for the University. Elected Secretary for College Senate Faculty.
The department strives to provide excellent patient care through diagnostic imaging and interventional radiology as well as train the next generation of physicians in radiology. In order to meet these goals we have recently updated our fluoroscopic imaging suite and begun renovations on our MRI building in anticipation of upgrading to a 3 Tesla magnet.

Our residents continue to receive training via the VA Gulf Coast (Biloxi) and our teleradiology hospitals.

Five residents completed the program this year. Dr. Stacey Black embarked upon a Fellowship in Interventional Radiology at the University of Arizona Health Science Center in Tucson, Arizona. Dr. Renee Bonetti began a Fellowship in Pediatrics at Vanderbilt University, Nashville, Tennessee. Dr. Eric Duffy began a Fellowship on Musculoskeletal at Penn State University in Hershey, Pennsylvania. Dr. Tara Otto also began a Fellowship in Musculoskeletal at the Mayo Clinic in Jacksonville, Florida. Dr. Brandon Nichols joined the George County Regional Radiology group in Lucedale, Mississippi.

The faculty recognition award for excellence in teaching was presented to Dr. Shikha Khullar by the 2012 radiology graduating class. The graduating class also presented a gift to Mrs. Vanessa Brown, Program Coordinator, for her outstanding contributions to their educational experience. Plaques were awarded to Drs. Michael Harpen and Donald Herbert, by the Radiology Department, for many years of excellent teaching to the residency program and dedicated services respectively.

Dr. Samuel McQuiston and Dr. Brad Steffler received the Red Sash award from the 2012 medical students graduating class and Dr. Steffler was appointed an Associate Member of the Mitchell Cancer Institute.

Mrs. Vanessa Brown was selected as the representative on the Graduate Medical Education Committee from the Program Coordinator Council.

Frotan MA. Invited speaker. Thermal injury. 3rd Annual Greater Gulf Coast Trauma and Acute Care Surgery Symposium; 2012 Mar 22; Mobile, AL.

Gonzalez RP. Invited speaker. Clinical clearance of the cervical spine in patients with distracting injuries: it is time to dispel the myth. Eastern Association for the Surgery of Trauma; 2012 Jan 13; Lake Buena Vista, FL.

Gonzalez RP. Invited speaker. Craniofacial impalement: projectile saw blade fragment to the head. Southeastern Surgical Congress; 2012 Feb 14; Birmingham, AL.

Gonzalez RP. Invited speaker. Current diagnosis and management of ARDS. 3rd Annual Greater Gulf Coast Trauma and Acute Care Surgery Symposium; 2012 Mar 22; Mobile, AL.

Gonzalez RP. Invited speaker. Is helicopter evacuation effective in rural trauma transport? Southeastern Surgical Congress; 2012 Feb 14; Birmingham, AL.

Gonzalez RP. Invited speaker. Tracheostomy timing in the intensive care unit: a retrospective analysis. Southeastern Surgical Congress; 2012 Feb 13; Birmingham, AL.
Luterman A. Invited speaker. Burn update. 21st Annual Surviving Trauma Conference: EMS District 1 EMS Council, Baptist Health Care, Sacred Heart Health System, West Florida Healthcare; 2011 Nov 19; Pensacola Beach, FL.

Nijhawan S. Invited speaker. Morbid obesity and indications of bariatric surgery. Mobile County Department of Health; 2012 Apr 11; Mobile, AL.

Nijhawan S. Invited speaker. Morbid obesity and indications of bariatric surgery. Atmore Community Hospital; 2012 May 16; Mobile, AL.

Nijhawan S. Invited speaker. Morbid obesity and indications of bariatric surgery. Franklin Primary Health Center; 2012 May 17; Mobile, AL.

Richards WO. Invited speaker. Mesenteric ischemia still a problem with early diagnosis and gastroparesis treatment with implantable gastric simulators. Auckland NZ GI Motility Meeting; 2011 Nov 1; Auckland, New Zealand.

Rodning CB. Invited speaker. Cervical pharyngostomy. Southeastern Surgical Congress; 2012 Feb 13; Birmingham, AL.

Rose M, Richards WO. Invited speakers. Laparoscopic longitudinal jejunectomy for intussusception after gastric bypass. Southeastern Surgical Congress; 2012 Feb 12; Birmingham, AL.

Simmons JD. Invited speaker. APRV – basic concepts and principles. Surgery Grand Rounds. University of Mississippi Medical Center; 2011 Nov 9; Jackson, MS.

Simmons JD. Invited speaker. Diagnosis and management of urological injuries. 3rd Annual Greater Gulf Coast Trauma and Acute Care Surgery Symposium; 2012 Mar 23; Mobile, AL.

Simmons JD. Invited speaker. Oxygen utilization. Hardy Society Meeting; 2012 Apr 19; San Destin, FL.
Simmons JD. Invited speaker. The mangled extremity. Alabama and Mississippi Chapters of the American College of Surgeons Annual Conference; 2012 Jun 15; Destin, FL.

V. NATIONAL PROFESSIONAL RECOGNITION

Sidney B. Brevard: Diplomat: American Board of Surgery; Fellow: American College of Surgeons; Member: Society of Critical Care Medicine; Member: Eastern Association for the Surgery of Trauma.

Carlo M. Contreras: Reviewer: *Journal of Palliative Medicine, Annals of Surgical Oncology.*

D. Lynn Dyess: Guest editor, American Surgeon Board.

M. Amin Frotan: Member: 2012 American College of Surgeons, 2012 Eastern Association for the Surgery of Trauma, 2012 Society of Critical Care Medicine, 2012 American Burn Association, Association for the Surgery of Trauma.

Roy E. Gandy: Editorial Board: *Current Surgery,* Member: Association of Program Directors in Surgery; Member, Association for Surgical Education.

Richard P. Gonzalez: Chairman, Gulf Region State Trauma Advisory Council, Mobile, AL; Member: Alabama State Trauma Advisory Council; Member: Committee on Trauma Care, Medical Association of State of Alabama; Member: Advisory Board, University of Alabama Birmingham Transportation Center; Reviewer: *Journal of Trauma, Journal of American College of Surgeons, Journal of Surgical Education, American Surgeon.*

Sheetal Nijhawan: Ad hoc Reviewer: *Surgical Endoscopy,* Member: Society of American Gastrointestinal and Endoscopic Surgeons (SAGES), Member: American Society of Metabolic and Bariatric Surgery (ASMBS); Associate Fellow: American College of Surgeons (ACS); Writer: ExamMaster.com.

Paul F. Rider: Member: American Board of Colon and Rectal Surgery; Clinical Trial: CBSG Study Group. Bioabsorbable staple line reinforced in colorectal anastomoses: analysis of a prospective randomized study. Keck School of Medicine at the University of Southern California Department of Surgery, Division of Colorectal Surgery. Los Angeles, CA.

Frederick M. Silver: Member: Alabama 3 Disaster Medical Systems Team (DMAT).

Jon D. Simmons: Member: Society of Critical Care Medicine, Southeastern Surgical Congress, Eastern Association for the Surgery of Trauma; Candidate: Fellow of American College of Surgeons.

VI. BRIEF SUMMARY OF ACTIVITIES AND PROGRESS

Medical Student Education: The Department of Surgery continues to have a leadership role in many aspects of student education. Drs. Brevard, Dyess, Gandy, Gonzalez, Hodge, Luterman, Rodning, Richards, and Simmons, and were awarded the red sash award by the senior medical students for their contributions to education. In addition, many faculty including Drs. Luterman and Richards are playing a vital role in creating active learning exercises for the first and second year students under the new curriculum.

General Surgery Residency Training: William O. Richards, M.D., F.A.C.S. took over as Program Director and along with the newly recruited associate program director Jon Simmons, M.D., F.A.C.S. implemented multiple changes in resident education with very
positive results. The number of categorical general surgery residents was increased from 4 to 5 residents per year and 5 new categorical PGY 1 residents were matched to the program. The ACGME Residency Review Committee made a site visit to the program in August 2012 and found substantial improvements in all areas of resident education.

Recruitment: With the retirement and resignation of several faculty the Department has recruited heavily to fill positions and increase the clinical, academic and educational missions of the Department. Five new faculty members (Drs. Frotran, Gosche, Gulati, Nijhawan, and Simmons) were recruited to the Department of Surgery.

Division of Traumatology/Surgical Critical Care: Richard P. Gonzalez, M.D. F.A.C.S. Professor and Director of the Division and has submitted an application to create a new Surgical Critical Care Fellowship program.

Dr. Mohammad Amin Frotran was recruited from fellowship training in Surgical Critical Care and has been made Director of critical Care in the Burn Unit. Dr. Frotran has made a huge impact in resident education with many hours spent on mock oral boards and preparation for clinical practice.

Dr. Jon Simmons was recruited from fellowship training in Surgical Critical Care and has provided outstanding leadership for resident education as the newly appointed Associate Program Director for General Surgery Residency training program. Many of the accomplishments for the residency program and the tremendous advances in academics, ABSITE performance, and educational activities of the Department of Surgery can be directly attributed to Dr. Simmons.

Pediatric Surgery: Dr. John Gosche, an experienced pediatric surgeon who was the Chief of Pediatric surgery at the University of Nevada Las Vegas, has been recruited to the Division. Dr. Gosche has an excellent reputation as an outstanding surgeon and educator, and he will fill the void left by the departure of Dr. Celeste Hollands.

Colorectal Surgery: Dr. Paul Rider has developed a multidisciplinary colorectal cancer clinic at the Mitchell Cancer Institute in collaboration with radiation and medical oncologists in order to provide improved cancer care in the region. He has been instrumental in developing a clinical research program that identified best practices for rectal surgery. Dr. Rider has provided an expert clinical service in Colorectal Surgery across the board and increasingly, USA Department of Surgery is recognized for its clinical expertise in colorectal and gastro-intestinal surgery.

General Surgery: A generous endowment by Dr. Charles and Mary Rodning for the educational activities of our residents has been a tremendous boost. Many faculty and staff as well as outside surgeons have given generously to this fund which continues to increase its endowment.

Breast and Endocrine: Dr. Lynn Dyess has moved to the MCI clinics and has increased her clinical load substantially. We are adding nurse practitioner clinics so that they can
provide long term care for breast cancer patients as well as starting a new thyroid clinic for evaluation and treatment of thyroid lesions. This will enable Dr. Dyess to focus on new patients to the practice with a subsequent increase in surgical procedures.

**Plastic and Reconstructive Surgery:** Dr. Salil Gulati was recruited from fellowship training in Plastic and Reconstructive surgery to provide expert burn care as well as reconstructive surgery in the division. He serves as the Medical Director of the USA Regional Burn unit. This has led to the very successful transition from the directorship of Dr. Amie Luterman to Dr. Gulati serving as the Medical Director and Dr Frotan as the Critical Care Director of the burn unit. Recently, Drs Gulati, Frotan, and Hodge attended the American Burn Association meeting with other members of the Burn Unit, and have started multiple clinical research projects.

**Gastrointestinal and Bariatric surgery:** Dr Sheetal Nijhawan was recruited from Fellowship training in order to amplify our minimally invasive and bariatric surgery capabilities. She been awarded a Society of American Gastrointestinal and Endoscopic Surgeons research award (SAGES) for 2012: "Effects of Bariatric Surgery on Mitochondrial Function and Insulin Resistance.” She has been instrumental in implementing the bariatric surgery database, and providing outreach programs, talking to physicians around the region that has increased our referral base for bariatric surgery.

**Surgical Oncology:** Dr. Carlo Contreras has served as the local Program Director at Providence Hospital developing a very fine rotation with high levels of resident satisfaction. He has been able to develop research collaboration with other members of the USA Mitchell Cancer Institute and with our Division of Gastroenterology.

**Research:** The Department has increased collaboration between basic science departments specifically; the research collaborations between Drs. Gillespie, Alvarez, Cioffi, and others have been very fruitful. We have implemented a clinical core to collect blood, muscle and other tissue samples from our patients and to measure microcirculation non-invasively in critically ill trauma and burn patients, ultimately, with the goal to submit a P50 trauma/burn center grant in collaboration with basic science departments in the COM. In addition, avenues of research developed between the basic scientists in the COM and surgeons looking at reversal of the metabolic syndrome after bariatric surgery have resulted in 2 competitive grants being funded.

William Richards, M.D. F.A.C.S. was awarded an American Society of Metabolic and Bariatric Surgeons (ASMBS) grant in 2011 for “Vascular Endothelium Changes after Bariatric Surgery.”
2011-2012
Summary of Scholarly Activities
Department of Biomedical Library

I. PUBLISHED JOURNAL ARTICLES, BOOK CHAPTERS, AND PATENTS

II. PUBLISHED ABSTRACTS

III. PUBLISHED BOOKS

IV. INVITED PRESENTATIONS

Burnham JF. Invited speaker. Medical librarianship. University of Southern Mississippi LIS 642: Special Libraries (online course); 2012 Sep 27; Hattiesburg, MS.

Clanton C. Invited speaker. Introduction to computers/medlinePlus. Our Neighborhood Healthcare Clinic at Dumas Wesley, Sybil Smith Family Village; 2011 Nov 17; Mobile, AL.

Clanton C. Invited speaker. Introduction to computers/medlinePlus. Our Neighborhood Healthcare Clinic at Dumas Wesley, Sybil Smith Family Village; 2012 Jul 31; Mobile, AL.

V. NATIONAL PROFESSIONAL RECOGNITION

Robert Britton: Co-editor of Synapse, the newsletter of the Alabama Health Libraries Association; Member, Academy of Health Informational Professionals.

Judy Burnham: Member, Medical Library Association Estelle Brodman Academic Librarian of the Year Award Jury and now Chair of that Jury; Research Mentor, Southern Chapter/Medical Library Association; Member, Honors and Awards Committee for Southern Chapter/Medical Library Association; Member, Program and Education Committee of the Association of Academic Health Science Libraries; Chair-Elect Consortium of Southern Biomedical Libraries (CONBLS); Distinguished member of the Academy of Health Information Professionals.

Clista Clanton: Member, Our Neighborhood Healthcare Clinics Advisory Council; Senior member of the Academy of Health Information Professionals.

Trey Lemley: Member, Medical Library Association Louise Darling Medal for Distinguished Achievement in Collection Development in the Health Sciences; Member, Research Committee of Southern Chapter/Medical Library Association; Member, Southern Chapter/MLA History Committee; Member, Academy of Health Information Professionals.

Jie Li: Chair, Health Libraries Partnership Committee of International Cooperation Section/Medical Library Association; Member, Cunningham Fellow Itinerary Committee, International Cooperation Section/Medical Library Association; Chair, Emergency Preparedness Committee, Alabama Health Libraries Association; Member, Emergency Preparedness Committee/Regional Advisory Committee/National Network of the Libraries of Medicine (NNLM) Southeast-Atlantic Region (SE/A); Member, Online Content Committee for the Network of Alabama Academic Libraries; Distinguished member of the Academy of Health Information Professionals.
Justin Robertson: Member, Public Relations Committee, Southern Chapter/Medical Library Association; Editorial Boards: *Journal of Electronic Resources in Medical Libraries*, *Perspectives in International Librarianship*; Member, Consortium of Southern Biomedical Libraries (CONBLS) Nominating Committee; Member, Technology Committee, National Network of Libraries of Medicine (NN/LM) Southeastern Atlantic Region (SE/A); Co-State Administrator, Health InfoNet/Go Local Expansion Project; Member, Health InfoNet Advisory Board; Member, Health InfoNet Education Committee; Member Health InfoNet Standards Committee; Senior member, Academy of Health Information Professionals.

Geneva Staggs: Member, Southern Chapter/Medical Library Association Nominating Committee; Distinguished Member, Academy of Health Information Professionals.

Andrea Wright: Member, Communications Committee, Southern Chapter/Medical Library Association; Member-at-Large, Alabama Health Libraries Association; Web Co-Coordinator, Alabama Health Libraries Association; Member of the Academy of Health Information Professionals.

VI. BRIEF SUMMARY OF ACTIVITIES AND PROGRESS

Services
Two librarians continue to attend committee meetings, including hospital management meetings at both the Medical Center and Children’s and Women’s Hospital as well as the Graduate Medical Education Committee. A librarian continues to serve on the College of Medicine (COM) Curriculum Committee and has participated in the revision of the COM curriculum. The Evidence-Based Medicine/Medical Informatics Thread (EBM/MI) was revised and integrated into the new curriculum. A Biomedical Library librarian continues to serve on the COM Continuing Medical Education Committee. Two Biomedical Library librarians serve on Faculty Senate (one for University Libraries and one as Caucus Leader for the College of Medicine.) A Biomedical Library librarian serves on the University Library Committee. The Biomedical Library Director also serves as ex-officio member of the University Library Committee.

Librarians are training for the University’s new content management system, Sakai, and Project Sites have been set up for the EMB/MI thread and for Biomedical Library instructional sessions.

Biomedical Library librarians provided orientation for new medical students, third year medical students, and new COM faculty as well as an online orientation tutorial for new residents. They also prepared online modules for independent learning activities for the EBM/MI thread. Library instruction was also provided for College of Nursing and College of Allied Health Professions students.

A web page with information on mobile access and apps for both our subscribed resources and free resources was developed.
As a part of the USAMC Heart Team, a Biomedical Library librarian provided
information used in the development of guidelines and procedures for the new heart
patient protocols. Additionally, she developed a patient education protocol for patients
scheduled for heart procedures. She applied for and received grant funding to purchase
needed equipment and supplies for this project.

An iPad Users Group was investigated, but because of lack of participation, other
avenues to communicate information about utilization of iPads will be used, i.e., blog
posting, Facebook and Biofeedback.

Twelve laptops were transferred from COM Educational Technology and Services to the
Biomedical Library. These will be available for in-house check-out at both the Campus
site and the Medical Center site of the Biomedical Library.

To enhance the new COM curriculum, a Clinical Skills Multimedia web page has been
developed with links to appropriate videos and audio tools.

Biofeedback, the Biomedical Library newsletter is now published bi-monthly in blog
format.

A Biomedical Library librarian continues to check citations for both College of Medicine
dissertations and for the College of Medicine Annual Report.

Facility
Effective 12/1, the Children’s and Women’s Hospital Library site is not staffed. The
Assistant Director worked to develop a plan for the transition. The plan was
communicated to appropriate C&W Hospital administration. Instead, the library is
open/closed each day by C&W Security. Staff from HIRC at USAMC visits the C&W site daily to check for problems. The Biomedical Library Systems Department checks weekly. A greeting screen with contact information is available on a monitor on the
desk. A phone is located on the desk for contacting the Campus Reference Desk and the
C&W Library phone is forwarded to HIRC. Appropriate phone numbers are laminated to the
front desk. Hospital administration schedules usage of the conference room in the
facility. Procedures were developed and posted for operation of the projection equipment.
Procedure was developed for copy cards. A book return was ordered and installed. The
cash register was removed.

The student break room at the campus site of the Biomedical Library has proved popular.
In addition to two tables/chairs and a microwave, the room contains snack and soft drink
vending machines and a coin-op coffee unit.

Funding has been identified to set-up wireless printing at the Baugh (Campus) site.
Funding has also been identified to repurpose the computer lab into an inter-professional
collaborative learning center.
The reference collection was weeded to remove obsolete books. Because many of the texts are now available electronically, the current shelving was not needed after the weeding project and the shelving was removed.

A problem with after-hours entry at HIRC/USAMC was resolved with the installation of a new door lock. During a period of time, after-hours access was not available.

A plan is being developed to combine the Circulation and Reference areas into a single service point on the first floor.

**Outreach**
During National Medical Libraries Month, webinars and classes that focused on Biomedical Library resources were held.

Biomedical Library librarians participated in the USA Benefits Fair. Biomedical Library librarians participated in the University pipeline programs, DREAM, STARS and STRIPES. For STARS and STRIPES, instruction was provided on conducting library research. A librarian participates in an outreach project at Dumas Wesley and 15 Place with Our Neighborhood Healthcare Clinic, providing instruction on health literacy and on accessing quality health care information.

Biomedical Library librarians acquired extramural funding to exhibit at the following meetings: Alabama Pharmacy Association, Alabama Family Physicians and Alabama Occupation Therapy Association. Each exhibit focused on the resources provided by the National Library of Medicine as well as other quality resources.

The Biomedical Library continues to participate in the Center for Healthy Communities activities including the Health Disparities Research Group, and the Community Health Advocates.

**Resources**
The following e-book collection was added this year:

- 412 Springer e-book titles were added via the Network of Alabama Academic Libraries including subjects Biomedical and Life Science, Behavioral Sciences (publication year 2012).

All appropriate new e-book titles were added to the e-book search page and work is progressing to add them to the online library catalog.

An analysis of the journals included in the AMED database was conducted. It was found that all but 69 of the over 500 titles are available in other databases. These 69 titles are obscure, not essential titles. The resource was cancelled.

The collection assessment project is continuing with outdated resources being withdrawn from the collection.
To better support the new COM curriculum, access to Access Medicine was converted to a model that allows unlimited simultaneous users.

After analysis of various tools that could be used to better utilize the Biomedical Library e-book collection, the EBSCO Discovery Service was selected. This resource was purchased in conjunction with the University Library. Interface to the tool is being developed.

**Personnel**
One employee, Marian Lee, retired during the year and another, Loretta Johnson, passed away. With the changing in staffing of the Children’s and Women’s Hospital Library site, two paraprofessionals were transferred from C&W Hospital Library to campus to fill vacant positions. Because of budget reduction, three staff positions and one librarian position are unfilled at this time.

**Miscellaneous**
The estate of Dr. Nestor Flodin donated $25,424.98 to the Biomedical Library. These funds will be used for the wireless printing project and the inter-professional collaboration center.

Based on a projected budget reduction, the Biomedical Library developed a plan to cut expenses 10% for 2011-2012 FY. Savings will include unfunded positions, restricted hours at the C&W hospital library, shortened hours at the campus location, restricted travel funds and cuts in resources.

The faculty and graduate students of the College of Allied Health Professions (AH) were surveyed to determine satisfaction with the services and resources. Overall, AH faculty rated the services, facilities, web page and collection greater than 4.3 on 5.0 scale. Overall AH graduate students rated the services, facilities, web page and collection greater than 4.0 on a 5.0 scale. Results of the surveys, especially the comments will be used during the planning process for 2012-2013.

Aggregate data from the Summary of Value of Library and Information Services in Patient Care Study was received. Data from USA participants was equivalent in most areas to that from the national data. USA data indicates that information made a difference in how a clinical situation was handled and had a positive effect on patient care. Data indicates the information was valuable and saved the clinician time and that adverse effects were avoided as a result of the information. Data indicates that the library/information resources are more important to physicians than discussion with colleagues or lab tests. Of the top five resources, the Biomedical Library provides access to three resources and the hospital provides access to the remaining two.
Online journals, UpToDate and MEDLINE are the top information resources for USA physicians and residents. Of the ten resources listed, the Biomedical Library provides access to seven. Data indicates areas of educational need concerning other resources available from the Biomedical Library and also indicates the need for education on library web page vs search engine. Overall participation for USA was 10%.

A Biomedical Library librarian is working with the IPEC Working Group, a team of colleagues from the Colleges of Medicine, Nursing, Allied Health Professions, and the Department of Sociology, Anthropology, and Social Work that are interested in Interprofessional Education and Collaboration (IPEC). The group recently received an intramural grant to evaluate IPEC across the health sciences at USA.

A Planning Retreat was held to develop goals for 2012-2013.
2011-2012
Summary of Activities
USA Center for Lung Biology

General Operations

The CLB's mission is to provide state-of-the-art scientific development in lung biology that advances the understanding of human health and disease, to improve patient care, and to serve as the foundation for outstanding graduate, post-graduate, and fellowship training. More than 40 faculty members and 25 graduate students, postdoctoral fellows and pulmonary fellows from various departments within the College of Medicine are actively participating in a strong collaborative research environment, a research seminar series and journal club, and graduate, postdoctoral and fellowship training.

The CLB submitted its biannual Newsletter in November of 2011 and again in July of 2012. These issues were distributed to our academic colleagues throughout the country as a way to illustrate exciting research and academic opportunities in the Center. Our next issue will be released in the Fall of 2012 (http://www.usahealthsystem.com/CLBNewsletter).

We have continued to update our CLB website along with the College of Medicine. Our Meet the Professor series shares the academic lives and careers of our CLB faculty. In this series, we take an in depth look at where our faculty member started, and the life and career decisions that impacted where they went, what they studied, and how they did. We look at their successes and their failures, and probe how these outcomes impacted their next career stage(s). This series is a personal tribute to the lives we lead. You see from this series that not all life decisions are scripted, that the reasons for why decisions are made are not always clear, and that life changes along the journey repeatedly probe our value systems. Enjoy this personal tour through our faculty's life experiences. Our next series will interview Dr. Ivan F. McMurtry. Come meet our professors at http://www.usahealthsystem.com/MeettheProfessor.

The Running and Walking Club provides a coordinated mechanism for CLB members to share in their active lifestyles. Members meet twice a week in front of the Medical Sciences Building for a group run/walk. In addition, we run and walk at area-sponsored 5K, 10K, half marathon and marathon events. Workout schedules are provided online in the Training Schedule section. The workout schedule is adaptable for any individual's goals. We also provide a summary of recent scientific articles that highlight important health issues in our Science for Health section. Our second article on Run Forest Run...like your life depends on it is shown below. Visit our Running and Walking Club at http://www.usahealthsystem.com/RunningandWalkingClub.

Science for Health

Run Forest Run...like your life depends on it. Considerable attention has been paid to the value of daily exercise, including a reduction in susceptibility to cardiovascular disease. In fact, the hemodynamic response to exercise is a
predictable determinant of cardiovascular health, and for these reasons, has become increasingly important in documenting health status. Cardiovascular risk is associated with an exaggerated blood pressure response to exercise, and exercise capacity provides an objective assessment tool for cardiovascular reserve. For example, the six-minute walk test is a standard assessment tool for the integrated indices of cardiopulmonary hemodynamic status in pulmonary hypertension patients.

While it is increasingly well known that daily aerobic exercise improves cardiovascular health, the link to longevity has not been systematically tested. This issue was recently addressed by a multi-center group of investigators led by Dr. Koch at the University of Michigan\(^1\). These researchers took advantage of rats selectively bred into groups with high and low aerobic capacities, capacities that were tested using treadmill running capacity. Cohorts of the rats bred from generations 14, 15, and 17 were tracked for survivability, in relation to cardiovascular fitness, including measurements of maximal oxygen uptake. The mean lifespan of low aerobic capacity rats was as much as 45% shorter than the lifespan of high aerobic capacity rats; 50% survival of low aerobic capacity animals was 24 months, and of high aerobic capacity animals was 36 months. Declines in systolic and diastolic cardiac function were documented as rats aged, and were especially prominent in low aerobic capacity animals. These collective findings reveal that chronic aerobic exercise, and improvements in aerobic capacity, provides a longevity survival advantage. Perhaps we have the fountain of youth at our fingertips after all.

References

Our administrative offices are located in the Medical Sciences Building in Rooms 3340 and 3342 on the main University campus. Ms. Jennifer Collins and Ms. Charlene Jordan serve as support staff for the CLB and are responsible for clerical duties for the administrative office and research laboratories.

Detailed information about the CLB is available with a click on our homepage (http://www.usouthal.edu/clb). The web page is interactive and contains a variety of information including faculty and student bibliographies, recent publications, and information regarding scientific and training programs. A complete annual report is available through Ms. Charlene Jordan (414-8045) at the CLB office.
Research Activities

The CLB was well represented at national and international scientific meetings with a number of faculty, postdoctoral fellows, and graduate students presenting their work at multiple forums, including the American Heart Association, Federation of American Societies for Experimental Biology, American Physiology Society, and the International American Thoracic Society.

Our Critical Care Conference series in conjunction with the Pulmonary Division hosted three speakers. This conference focuses on translational research and acute lung injury, and is held monthly on Fridays at 2:00 pm. Dr. Andrew Paul Fontenot, Henry N. Claman Professor of Medicine, and Head, Division of Allergy and Clinical Immunology at the University of Colorado Denver School of Medicine presented How metals become antigens: role of genetic susceptibility and T cell activation in beryllium-induced disease? Dr. Natalie Bauer, Assistant Professor of Pharmacology at the University of South Alabama presented Microparticles in pulmonary vascular disease. Dr. Stephen Ballard, Professor of Physiology at the University of South Alabama presented Mucociliary Transport, Glands, and Cystic Fibrosis Lung Disease.

Extramural Funding

In the past year, CLB principal investigators submitted 22 grant applications to the American Heart Association (AHA), National Institutes of Health (NIH), and other foundations/industries. To date, two of these applications along with four from the previous fiscal year were awarded generating over $12.1 million in new revenue over the next five years. This represents a 46% success rate in grant submission for this fiscal year with 9 applications pending.

The Center received four awards from NIH and two awards from outside foundations. Dr. Mark Gillespie received a R01 Research Grant and a subcontract with Exsien Corporation on a R41 Small Business Technology Transfer program grant. Dr. Troy Stevens received a competitive renewal on our P01 Program Project Grant, and Dr. Audrey Vasauskas received an F31 National Research Service Postdoctoral Fellowship. Dr. Sarah Sayner received a pulmonary research fellowship from the Parker B. Francis Foundation. Dr. Victor Solodushko received a grant in aid from AHA, Greater Southeast Affiliate.

Education

During this academic year, 24 predoctoral fellows trained in the laboratories of CLB faculty. Of these trainees, 19 are affiliated with the Lung Biology track in the Basic Medical Sciences Doctoral Program. In this academic year, one CLB trainee held an individual predoctoral fellowship (F31) from the NIH (Ochoa). Cristhiaan Ochoa defended his dissertation in May 2012 and entered a physician scientist training program at University of Texas Southwestern in Dallas, Texas.

The NIH-funded T32 training grant on Cell Signaling and Lung Pathobiology, directed by Dr. Mary Townsley, is currently in its 9th year of funding. The T32 supports 6 pre-doctoral trainees per year, along with 4 short-term summer research trainees. Summer trainees are drawn from the COM medical students or engineering master's students who apply for summer research positions in the CLB.
The “Did you know?” series, now in its seventh year, is a series of brief historical perspectives authored by CLB trainees. These perspectives review influential discoveries that led to the modern understanding of pulmonary and critical care medicine. In this past year, our trainees authored articles on ventilation and preterm infants (Ashley DeCoux), discovery of the pulmonary circulation (Abdullah Alzoubi), and carbon nanotubes and lung disease (Patricia Villalta). The archives of the series can be found at: http://www.usahealthsystem.com/archives.

Finally, the CLB and the Division of Pulmonary and Critical Care held the first collaborative “Annual Lung Bowl” in June 2012. Predoctoral students, postdoctoral fellows, and clinical fellows in CLB training programs were organized into five teams for the competition, while CLB faculty, staff, and undergraduates cheered teams on. Using a team-based learning format, teams tackled case scenarios focused on pathophysiology or clinically-relevant problems. Points were accumulated from individual and team responses to questions in the case scenarios, quick fact questions in the speed round, and the final jeopardy round where teams could bet all-or-nothing on their response to a final historical question. Team “Pulmonauts” – Ali Riaz, Audrey Vasauskas, Jared McLendon, and Patricia Villalta – became the 2012 Lung Bowl Champions.
2011 – 2012
Summary of Activities
Center for Healthy Communities

Overview
The USA Board of Trustees established the Center for Healthy Communities on September 4, 2004 to help the University better address the needs of underserved residents in the Gulf Coast Region. The Center has enjoyed continued growth and development during its existence and has achieved local, regional and national recognition as an effective vehicle by promoting education, research and public service for targeted communities.

The primary activities of the Center are under the umbrella of the Center of Excellence Grant (P-20) of the National Center for Minority Health and Health Disparities of the NIH. The bulk of the Center’s community outreach programs are funded by that grant. The Center has enjoyed funding for several other research projects. In this report we have included a summary of Activities for the last year of the Center of Excellence Grant and brief summaries of other research projects taken on by the research core.

Of note, the Center successfully renewed its Center of Excellence Grant from the National Center of Minority Health and Health Disparities (1P20 MD002316). We received notification of grant renewal for 5 additional years in June 2012. Funding will continue at current levels ($950,000 per year, direct). The dates of funding for the 5 year renewal are February 1, 2012 through January 31, 2017. The grant ending June 30, 2012 (the first 5 years of the P-20 Center of Excellence Grant) will run with a no cost extension through January 31, 2013.

Highlights:

Community Engagement Core (Directors: Roma Hanks, PhD, Hattie Myles, PhD):
We continued our Community Health Advocate (CHA) Program and out Pipeline Programs. The CHA’s continued to promote improved community and individual health through a variety of initiatives, including CHA Directed Projects. These projects have been focused on obesity, physical activity, nutrition, hypertension, diabetes and prevention and cardiovascular disease.

The Pipeline Programs had another successful year. During the summer of 2012 there were 13 students participating in the STRIPES program (rising high school juniors) and 12 students participating in the STARS program (rising high school seniors). Four students participated in the Shadowing Program (rising college freshmen). Six students participated in the Undergraduate Research Program (college undergraduates and medical students).

Research Core:
The research core was busy over the last year with several projects and the Health Disparities Research Group (HDRG). The HDRG continued with its collaborative projects with the Bay Area Women’s Coalition and has continued the initiative of research apprentice started several years ago. This program has resulted in a newly funded pilot project focusing on enhancing care of diabetes in the Trinity Gardens Community.
The Research Core had a portfolio of other projects. This includes projects directed toward addressing health disparities after a disaster (led by Dr. Martha Arrieta, Core Director), health benefits of family meals (Sharon Fruh, CRNP), the relationship between health utilization and labor history in poor neighborhoods in Mobile (Ken Hudson, PhD), the relationship between a novel protein and cardiovascular disease (William Gerthoffer, PhD), and understanding health literacy (Thomas Shaw, PhD). We have used a community based participatory research approach to development and implementation of these projects.

Health Information Dissemination:
We had a successful Regional Health Disparities Symposium on April 13, 2012. The title of the Symposium was “Community Academia: Partners for Eliminating Health Disparities and Promoting Equity in Care.” It was held at Via! Health, Fitness, and Enrichment Center in Mobile, AL. We focused on bringing together our community and academic partners and discussing our accomplishments and plans for the future. We had two keynote speakers. Mrs. Tara Taylor of the YMCA of Greater Cleveland, OH highlighted efforts of her organization to reduce obesity and improve physical activity among children using a program they developed called “We Run This City”. The other keynote speaker, Dr. Michael Minor, a Baptist Minister from rural Mississippi who has championed the churches role in promoting health, highlighted faith based initiatives to improve health in the African American Community. At this symposium we had several poster presentations that displayed the center’s work to date (2004 – 2012). Posters presented at this year’s Regional Health Disparities Symposium (April 13, 2012) are listed below.

POSTER SESSION for 2012 CHC Regional Health Disparities Symposium
April 13, 2012, Mobile, AL

Community Based Participatory Research

Pilot Projects

7. Fit and Faithful: Evaluation of a Church Based Fitness Program. Lee, R.

8. Zip Code-Level Mortality as Local Health Status Indicator. Arrieta MI, White HL.

14. Uncovering Health Literacy: Developing a Remotely Administered Questionnaire for Determining Low Levels of Health Literacy in Broad Based Populations. Shaw T.

18. Does Parents' Knowledge of their BMI Status And Cardiovascular Risks (CV) Improve their Children's BMI After 3 Months of Family Centered Intervention for Weight Management (FCI)? Preud'Homme D, Higginbottom L, Likely C, Phelps L, Pettry A, Blair-Elortegui J.

**Student Work**

20. Hospitalizations for Ambulatory Care Sensitive Conditions at the University of South Alabama Medical Center. Gulati A, Mohammed FA, Arriesta MI.

**Collaborators Work**

23. Librarians Contribute to Diversity in Health Care Professions. Rossini B, Burnham J, Wright A.

**Community Engagement (Work with and by The Center’s Community Health Advocates)**

27. The Peer Supported Diabetic Self-Management Program. Hodnett B.

29. Reaching the Community Through Health Ministry. Carter G.

**Other Presentations:**

Other CHC Activities

Telemonitoring of blood glucose in type 2 diabetes:

This project was funded by the Robert Wood Johnson Foundation (RWJF) Finding Answers Program and was done in collaboration with the Mobile County Healthy Department (Eichold, PI). In this project we test the hypothesis that real-time feedback for blood sugars via telemonitoring will improve control of diabetes among health disparate populations. Analysis of this work neared completion over the last year and we have expectations of several manuscripts being submitted over the next academic year.

Summary of Center for Healthy Communities Activities

The 2011-12 year has been a productive year for the University of South Alabama Center for Healthy Communities. The Center of Excellence Grant continues to successfully address its objectives and was renewed for another 5 years. We continue to be a point of contact for investigators interested in addressing questions in health disparities. Our community and university partners continue to grow in number and commitment to our shared mission and vision.

Lafky D. Invited speaker. Countering the cyber threat in an emerging healthcare IT ecosystem. Military Electronic Health Records Conference; 2012 Mar 15; Washington, DC.

Lafky D. Invited speaker. Security integration into IT decisions. HIT Health Transformation Conference; 2012 Apr 3; Jacksonville, FL.

Roach RD. Invited speaker. Alabama One Health Record® - health information exchange and meaningful use overview. Alabama Medicaid Senior Staff Meeting; 2012 Feb 28; Montgomery, AL.

Roach RD. Invited speaker. Alabama One Health Record® - health information exchange and meaningful use overview. Alabama State University Health Information Management Assembly; 2012 Mar 9; Montgomery, AL.

Roach RD. Invited speaker. Alabama One Health Record® - health information exchange and meaningful use overview. Health Financial Managers Association Meeting; 2012 Mar 15; Huntsville, AL.
Roach RD. Invited speaker. Alabama One Health Record® - Alabama Medicaid, and the Alabama Regional Extension Center collaborative efforts. Centers for Medicare and Medicaid Services HITECH Conference; 2012 Apr 11; Baltimore, MD.

Roach RD. Invited speaker. Alabama One Health Record® - health information exchange and meaningful use overview. Alabama Physician’s Task Force Meeting; 2012 Apr 26; Montgomery, AL.

Roach RD. Invited speaker. Alabama One Health Record® - health information exchange and meaningful use overview. CPSI National Physician User’s Group Meeting; 2012 May 12; Sandestin, FL.

Roach RD. Invited speaker. Stage II meaningful use. Alabama Healthcare Information and Management Systems Society Meeting; 2012 Sep 21; Birmingham, AL.

Ross C. Invited speaker. In the eye of the storm: creating a community response network starts within your community. Alabama Primary Health Care Association 26th Annual Conference; 2011 Oct 6; Mobile, AL.

Wallace D. Invited speaker. Emergency preparedness for community health centers. Health Care for Residents of Public Housing Regional Training Meeting; 2011 Nov 8; Austin, TX.

Wallace D. Invited speaker. The capability and capacity of hospitals to respond to the April 27, 2011, tornadoes; planning and responding to high-impact weather disasters. American Meteorological Society’s Fourth Conference on Environment and Health; 2012 Jan 24; New Orleans, LA.

Wallace D. Invited speaker. Preparedness training for environmental and natural disasters. Gulf States Shipbuilders Consortium; 2012 Mar 28; Mobile, AL.

V. NATIONAL PROFESSIONAL RECOGNITION

Deborah Laffy, Ph.D., MSIS, CISSP joined CSHI as Director in February, 2012. Previously, she served in the Office of the National Coordinator for Health IT, US Department of Health and Human Services. In that role, she directed the Health IT security function within the Office of the Chief Privacy Officer. She was the ONC lead for the Health IT Task Force Cybersecurity Working Group, chaired by the Hon. Howard Schmidt. She was the ONC lead for the Health IT Standards Committee, a Federal
Advisory Committee, and she was also the ONC lead for the Health Information Technology and Standards Panel Privacy and Security Working Group. Currently, she is a member of the board of directors of the National Health ISAC (Health and Public Health sector Information Sharing and Analysis Center, established under HSPD-7) and of the sector coordinating committee of the Health and Public Health sector. Dr. Lafky recently served as an advisor to the American Medical Association’s Health Security Card program, funded by the Center for Disease Control and Prevention. Dr. Lafky represents the Alabama Regional Extension Center at the executive level, including ONC Regional Grantee Meetings and at the REC Sustainability Summit in Denver, CO. She represented USA as a member of the Alabama Health Information Management Systems Society (HIMSS) advocacy group in September 2012, meeting with Congressman Bonner and his legislative assistant, along with legislative aides to Senators Sessions and Shelby on Capitol Hill. Dr. Lafky is active in professional societies including the American Medical Informatics Association, where she participates in the Consumer Health and Population Health workgroups; HIMSS, the Association for Information Systems (AIS), and ISC2, the professional society for information security. She serves on the advisory board for the American Medical Association’s Health Security Card for Use in Disasters and Public Health Emergencies: Translating Research into Practice. Dr. Lafky leads the ONC Staff and Alumni Association, and is active with the International Rectifier Alumni Association, leading the nomination of that company’s founder for the National Medal of Technology and Innovation.

Dan Roach III, MD continues to serve as Health Information Technology Coordinator for the State of Alabama.

David Wallace, DVM has been appointed to The Emergency Preparedness for Federally Qualified Health Centers National Working Group. The goal of this group will be to develop collaborations for training and technical assistance to address the unique needs of federally qualified community health centers (FQHCs), with a special focus on at-risk populations such as public housing residents and seniors. This national working group will share emergency preparedness resources and seek to build partnerships, linking federal interests with those at the state, local and community levels. David Wallace and Carolyn Ross were invited to support the USVI Department of Health during Operation Tide Breaker, a FEMA sponsored full-scale disaster response exercise in St. Thomas, USVI, December 12-15, 2011. The USVI version of AIMS (Alabama Incident Management System) was activated and managed during the exercise to provide real-time situational awareness and facilitate patient identification and tracking using the AIMS automated patient tracking module.

VI. BRIEF SUMMARY OF ACTIVITIES AND PROGRESS

Project Year 2011-2012 represented a transitional period for the Center for Strategic Health Innovation (CShI). Long-time director Carl Taylor was succeeded in February 2012 by Dr. Deborah Lafky, who took up the Director position after 5 years with the Office of the National Coordinator for Health IT (ONC). Since then, CShI has solidified organizationally around the following objectives: a) program integration across all lines
of activity; b) developing a high-performance team; c) increasing research activity. To those ends, CSHI has a) initiated a staff re-organization, with operations management spanning all CSHI programs; b) honed ALREC performance and attained a top national ranking among the 62 REC programs; c) pursued publication opportunities, provided for a research component in all new proposals, and participated actively in outreach to raise public awareness of the Center’s capabilities.

NCDMR: On-going improvements that lay the foundation for the National Center for Disaster Medical Response are nearly complete. New capacity coming online includes a tripling of medical simulator capacity, added decontamination training equipment, and high-definition immersive learning technologies to advance the process of disaster preparedness and response. In addition, improvements to the student experience are underway, including a professional registration facility with added wait-time amenities, an improved classroom sound system, and expanded staff facilities to accommodate approved open staffing slots. In September 2012, a candidate for NCDMR’s open professional trainer position was identified and accepted the position with a start date in October 2012. This will increase NCDMR’s training capability by 30%.

Alabama Incident Management System (AIMS): AIMS is management information software designed to capture Hospital Incident Command System (HICS) reported surge data, or information regarding the real-time status of a hospital’s ability to triage, treat, and transfer victims of a disaster in a timely manner. Critical data such as available beds, supplies, staffing, and equipment is entered into a database at each participating healthcare facility and then transmitted and displayed at the local or regional Emergency Operations Centers (EOC) for use making emergent decisions. CSHI boasts a total of 787 user facilities including: 18 Community Health Centers, 11 EMA facilities, 319 EMS providers, 1 EMS EOC facility, 12 ADPH EOC facilities, 27 Evacuee Shelters, 124 Hospitals, 17 Medical Needs Shelters, and 258 Nursing Homes. Under contract with the Alabama Department of Public Health Center for Emergency Preparedness (ADPH CEP), CSHI continues to promote AIMS as a daily use tool for health facilities across the state, as well as to develop and promote cross border links in AIMS. Enhancements and upgrades to AIMS include development and deployment of a people tracking module to track people in medical needs shelters and evacuate shelters during a disaster thereby enhancing the situational awareness of ADPH, development of a disaster information repository (ncdmer.org) to provide important disaster related information to disaster management officials, and continued development of social networking capabilities to encourage the establishment of local response regions among health facilities in the same region. In the past year, AIMS was utilized for monthly exercises, surveillance of heat related illnesses, and management of tropical storm/hurricane Isaac. New features include chatting capability to enhance facility to facility communication, an EPI surveillance tool, programming interface to allow automatic data reporting from hospital systems, further integration with social networking tools and development of a smart phone interface for reporting data.
Training Programs: Now in its ninth year, ARRTC is regional response training designed to teach effective collaborative healthcare community response to all disasters, natural or man-made. This program is made possible by a grant from the Alabama Department of Public Health Center for Emergency Preparedness through a cooperative agreement from ASPR. This year, CSHI offered training on-site in Mobile (ARRTC Basic) and at regional hospitals and other facilities throughout the state (ARRTC Road Show). ARRTC Basic was a two-day course designed to provide regional response partners charged with disaster preparedness, response and leadership responsibilities with basic, core disaster response training. Sessions were scheduled by hospital planning region, fostering interaction with regional response partners. This year, as a subset of ARRTC Basic, two ARRTC Administrative sessions were presented for Chief and Administrator level personnel charged with disaster response leadership for their organizations. This course featured nationally recognized speakers who shared their experience and expertise on disaster response leadership. ARRTC Road Show was a one day course which took ARRTC training to healthcare facilities across the state, thereby allowing participation by more staff, and inviting the participation of regional neighbors/response partners for the purpose of establishing and enhancing a common knowledge of the basics of disaster response for healthcare facilities. This year, Road Show course content was designed by each facility from a menu of topics to reflect the specific needs of each facility/area. In addition to ARRTC Basic and Roadshow, this year a pilot project was presented as ARRTC Advanced – Disaster Preparedness-Clinical Simulation Training. Five one-day interactive training sessions were held for clinicians charged with disaster response in their organizations. Including all three types of sessions, a combined total of 53 sessions were presented to participants, which included representatives from public health, hospitals, nursing homes, community health centers (CHCs), and emergency management and response agencies. Attendee evaluation scores were consistently high, with 98% rating the program as “Excellent” or “Good.”

Medical Informatics and Healthcare Technology Applications: CSHI continually endeavors to use emerging health technologies to improve the quality, cost, care, and access to healthcare within our state and beyond. One of the keys to our success is Realtime Medical Electronic Data Exchange (RMEDE™), a secure web-based life-state management system including in-home monitoring of patients with chronic disease and an interventional informatics reporting system. CSHI currently manages 1.1 million patient records and approximately 600 Medicaid patients participated in our in-home monitoring project. In 2011-2012, CSHI continued its critical partnership with the Alabama Medicaid Patient 1st program and the Alabama Department of Public Health for the delivery of in-home monitoring of patients using RMEDE™. In this program, patients suffering from chronic illnesses such as diabetes, congestive heart failure, and hypertension are monitored for significant changes by using an innovative Interactive Voice Response (IVR) system. Patients are instructed to dial-in their key physiologic parameters, and an ADPH Life Care Nurse is assigned to monitor the results and submit reports to the patient’s provider. CSHI also continued its’ partnership with the Medicaid Maternity Program in their quest for Better Birth Outcomes and lower Infant Mortality rates. RMEDE™ is used to develop a data collection system with reporting capabilities utilizing recipient information gathered from enrollment activities to evaluate compliance...
with accepted national standards of practice. RMEDE™ provides Medicaid and their contractors the ability to enter and view the data online. Data is utilized by Medicaid to determine benchmarks for compliance and comparisons.

In addition, we have continued our partnership with Alabama Medicaid to support the Patient Care Networks of Alabama (PCNA) project. PCNA is a primary care case management (PCCM) program which establishes regional networks of care or a “medical neighborhood” which is designed to improve the delivery of health care services to Medicaid recipients, especially those recipients with complex medical conditions of diabetes and asthma. RMEDE™ serves as the framework used by the PCNA for data management, patient risk stratification, patient case management, automatic agency to agency electronic referral, aggregation of Medicaid medical and pharmacy claims data, and program reporting needs. There are three active areas in the state with a fourth pilot area added this year.

CSHI continues to operate the Alabama Regional Extension Center (ALREC), which is the product of an $8.5 Million grant awarded by the Office of the National Coordinator for Health Information Technology (ONC). The mission of ALREC is to help primary care providers in small and medium-sized medical practices select, implement, and become meaningful users of certified electronic health record systems. CSHI is now halfway through the project and has emerged as one of the top 3 regional extension centers in the nation. We have already achieved our goal of enrolling 1304 providers, and have exceeded the expectations of ONC by helping 1212 “go live” on a certified electronic health record system and helping 420 providers reach meaningful use. Because of these successes, ALREC is one of only three RECs selected to be highlighted by means of a professionally produced educational video to be shown at the American Medical Informatics Association meeting in November 2012.

V. NATIONAL PROFESSIONAL RECOGNITION

Johnson Haynes Jr: Listed: America's Top Doctors and Best Doctors in America. Member, NIH Sickle Cell Advisory Committee; Member, Chapter Review on NIH Guidelines for Hydroxyurea Use in Adults; Member, CHEST Foundation National Inner-City Asthma Initiative Outreach Program; Fellow, American College of Physicians; Fellow, American College of Chest Physicians; Observational Study Monitoring Board, Chair.

VI. BRIEF SUMMARY OF ACTIVITIES AND PROGRESS

General Operations: Dr. Johnson Haynes, Jr. continues as Director of the USA Comprehensive Sickle Cell Center. Despite state funding cuts, the USA Comprehensive Sickle Cell Center continues to improve the delivery of clinical and educational services to individuals affected with sickle cell disease, family members of affected individuals, and health care providers.

Research: The Center is involved in 3 ongoing pharmaceutical sponsored research trials, “A Phase III, Prospective, Randomized, Double-Blind, Placebo-Controlled, Parallel-Group, Multicenter Study of L-Glutamine Therapy for Sickle Cell Anemia and Sickle B0 - Thalassemia,” A study of the “Incidence of Secondary Iron Overload in Adults with Sickle Cell Disease Following Chronic, Intermittent Red Blood Cell Transfusions” and a new research study, “A Randomized, Placebo-controlled, Phase 2 Study of HQK-1001 in Sickle Cell Disease.” In addition, Dr. Johnson Haynes is working with fellows in the Pulmonary Division and Dr. Karen Fagan on pilot studies investigating airflow obstruction in adults with sickle cell disease while having recently completing a study on the assessment of pulmonary hypertension in patients with sickle cell disease. Dr. Hamayun Imran is collaborating investigator and local PI for the TWITCH study at the University of South Alabama. This NIH sponsored study is led by St. Jude Children's Research Hospital. It is a national clinical trial for children with sickle cell disease on chronic transfusion therapy for critical TCD velocity. This is a 3-year project. Dr. Felicia Wilson has recently completed a Sickle Cell Center Grant from the Alabama Department of Public Health (ADPH), (10/1/11 to 12/31/11), and nears completion of a Newborn Screening grant also sponsored by the ADPH (10/1/11 to 9/30/12).
She is an investigator in the Multicenter Study of Iron Overload: Examining Mechanisms of Iron Trafficking and Extra-hepatic Iron Distribution in Sickle Cell Disease, Thalassemia, and other Iron Loading Anemias sponsored by the NIH/NIDDK.

**Clinical Operations:** The 2011-2012 academic year marks the close of the 13th year that the Adult Sickle Cell Clinic has operated as a subspecialty clinic. This clinic now serves over 215 clients. The primary objectives of this clinic are (1) to serve as a positive educational experience for primary care residents in the Departments of Medicine and Family Medicine at the University of South Alabama; and (2) to be a resource for practicing physicians in the University and private community. The clinic is staffed by Dr. Johnson Haynes Jr.; Ms. Ardie Pack-Mabien, Nurse Practitioner; Ms. Brittany Brown, R.N.; and Ms. Adrienne Petite, Case Manager. Both Internal Medicine and Family Medicine residents rotate on a monthly basis through the outpatient Adult Sickle Cell Clinic. The Adult Sickle Cell Clinic continues to serve the greater Mobile area in addition to a continuous influx of patients from surrounding areas.

Ms. Pack-Mabien and Ms. Brown continue to support the pediatric outpatient clinical operations and serve as liaisons when transitioning patients from pediatric to the adult services. A major addition to pediatric services this year was the formalization of the Pediatric to Adult Care Transition Program (PACT) with Brittany Brown as coordinator. Drs. Harayun Imran, Felicia Wilson, and Hafeez Siddiqui are physicians caring for patients in the Pediatric Sickle Cell Outpatient Clinic.

An adult hematologist and urologist to support the adult operations are lacking and there is no proposed solution to this deficit of overall clinical operations in sight.

**Education:** The Center faculty continues to provide a broad series of lectures throughout the academic and private medical community and continues to support the Counselor/Educator Certification Program, which takes place at the Sickle Cell Disease Association of America, Mobile Chapter. The USA Comprehensive Sickle Cell Center has sponsored a clinical based conference on practical issues involving sickle hemoglobinopathies for the last 12 years. Our 12th conference entitled, “Practical Issues XII: Casting the Net II” was held on Friday, September 7 and Saturday, September 8, 2012. This conference brings health care professionals together, in an interactive forum, to address relevant issues surrounding sickle cell disease. Our target audience is Internal Medicine, Family Practice, Pediatrics and other physicians, pharmacists, physician assistants, nurse practitioners, nurses, case managers and other allied health professionals.

The 2012 conference, “Practical Issues in Sickle Cell Disease XII: Casting the Net II,” featured Dr. Robert J. Adams for the Dr. Cecil L Parker, Jr. Sickle Cell Disease Distinguished Endowed Lectureship. Dr. Adams topic was “Primary Stroke Prevention Works: The Falling Rates of Childhood Stroke in SCD.” Dr. Thomas Butler, Associate Professor, Mitchell Cancer Institute, spoke on “Platelet Disorder in Sickle Cell Disease,” Dr. Susan Baker, Associate Professor, OB/GYN, spoke on “Pregnancy in Sickle Cell Disease,” Dr. Felicia Wilson, Professor of Pediatric Medicine, addressed “Newborn Screening in Sickle Cell Disease,” and Dr. Elise Labbe-Coldsmith, Professor, Department
of Psychology, discussed “Psychosocial Issues in Sickle Cell Disease.” Interesting and unique sickle cell disease cases were presented by Drs. Michelle Grier-Hall, Zakiya Douglas, and Sheryl Falkos. Dr. Alan Sanders addressed “Ethics in Pain Management, Fears, Realities and Needs,” and Dr Juvonda Hodge, Assistant Professor, Department of Surgery, presented “Cholecystectomy Indication and Special Considerations in Sickle Cell Disease.” Dr. Anthony Martino, Associate Professor and Chair for Neurosurgery, spoke on “Moya Moya / Encephaloduroarteriosynangiosis (EDAS) Intervention” and lastly Dr. Johnson Haynes, Jr., Professor and Director of the USA Sickle Cell Center, spoke on “Sickle Cell Disease and Air Travel.” The nursing staff continues to provide a series of lectures to the nursing community within the University of South Alabama and private hospitals in the Mobile community and surrounding counties. As we go forward, we plan to continue the clinical operations with the same drive and integrity as we have in current years. We will continue to seek the grant support necessary to continue all clinical and research activities as well as continue requesting the necessary financial support currently made available by the University of South Alabama College of Medicine.

Other Activities: Drs. Haynes and Wilson continue to serve as Alabama Sickle Cell Oversight Regulatory Commissioners where Dr. Wilson is president of the Commission. The Center’s newsletter, “Sickle Cell Today” is distributed across the State of Alabama to clients, client’s families, administrators, community sickle cell foundations, physicians and legislators in April and September of each year. As of August 1, 2011, Dr. Haynes was appointed Assistant Dean for Diversity and Cultural Competency in the USA College of Medicine, and Dr. Wilson was recently honored as a “Distinguished Faculty Member” by the Class of 2012.
The College of Medicine has a total of 2,262 alumni physicians representing thirty-six graduate classes (1976-2012). The Medical Alumni office has one full-time secretary, Cynthia Harris and a part-time assistant director, Melodie Robinson. The primary responsibility of the office is to maintain communication with graduate members and to organize events that accomplish the mission of advancing both alumni and student members.

Executive Board of Directors (Medical Alumni Association):

In June 2012, Dr. Amy Morris '93 completed her two-year term as President of the Medical Alumni Association. Dr. Jill F. Ringhold assumed the position and will serve until June 2014. Dr. Kit Outlaw '92 is vice-president. The following alumni physicians are members of the Board of Directors: Dr. Oscar Almeida '85, Dr. William Blaylock '89, Dr. Cynthia Donnell (who moved off the board in June), Dr. Lamar Duffy '84, Dr. Diana Hashimi '90, Dr. Johnson Haynes '80, Dr. Russell Hudgens '87, Dr. Wanda Kirkpatrick '78, Dr. Thomas Montgomery '81, Dr. Christopher Semple '85, Dr. John Todd '88, and Dr. Stacey Wing '96 (who also moved off the board in June). Two new members were elected starting June 2012: Dr. Maryella Sirmon '78 and Dr. Grace Hundley '04.

The Medical Alumni Association has one primary program responsible for funding activities for current and future members — the Annual Membership Dues and Annual Fund Program. The categories for membership include $100 per year for graduate physicians, $50 for physicians in training and $1,000 for a Lifetime Membership. Including lifetime members and AF donors, (the average gift was $100), 642 alumni contributed a total of $70,205. Nine physicians became lifetime members in 2011.

The major alumni event sponsored by the MAA is the Medical Alumni Weekend, which was held on June 1-3, 2012 at the Perdido Beach Resort in Orange Beach Alabama. Seven classes (1977, 1982, 1987, 1992, 1997, 2002, and 2007) were celebrating reunion dates. The weekend include CME programs: Dr. David Lewis, “Patient Quality and Safety Using Protocols;” Dr. Frederick Meyer, “Volume to Value;” Dr. Christopher Semple, '85, “Everything the Non-Ophthalmologist Needs to Know;” Dr. Michael Goodlet, '82, “Sports Concussions;” Dr. William Broughton, '82 “The Prion Story – A Front Row Seat;” and Dr. Robert Kreisberg, “The Art and Science of Cholesterol Lowering Therapy.” The MAA honored Dr. Frederick Meyer with their annual Distinguished Service Award for his commitment and service to the College of Medicine.

Scholarship development and recognition of academic achievement continues to be a focus for the Medical Alumni Association. In 2011-2012, the recipient of the Alumni Scholar Award for $25,000 was Jordon Fernandez. Other awards and scholarships sponsored by the Medical Alumni Endowment include the Clyde “Sid” Huggins Family Practice Award, the Lester Sockwell and the Christian Grinaker Memorial Scholarships. The Association also sponsored
one Legacy Scholarship. The Medical Alumni Leadership Award, in recognition of outstanding leadership by vote of her class was Kacie Jackson Saulters. In addition to these awards, the Association donated $50,000 to the Medical Alumni Endowment Fund, which was matched by the Dean of the College of Medicine.

Another significant endeavor for 2012 was the establishment of the Class of 1981 Scholarship Project. Chaired by Dr. Ed Panacek and the following committee members: Drs. Tom Montgomery, Vera Bittner, and Robert Chagraulis. A six-month fund-raising effort concluded on October 1, 2012 with class donations of real gifts and pledges totaling over $215,000, which will be deposited to the Medical Alumni Endowment Fund, with matching funds from the College of Medicine. The fund interest generated will be used to support recruitment of outstanding students.

Other activities organized by the Medical Alumni Office include the White Coat Ceremony and the Senior Class Reception. We also assisted with “Conversations with the Dean” a program inviting selected alumni to speak to students regarding their specialties and contemporary issues related to the practice of medicine. The MAA donated to various student organizations and events including the Winter Asclepian Ball, Skit Night, Review of Systems, and the annual Gumbo/Chili Cook-off for scholarship development. The Medical Alumni Office provides database support for Alpha Omega Alpha Honor Medical Society and assists with their dues program. AΩA sponsored a Visiting Professorship (Dr. Molly Cooke, UCSF) and one $4,000 student academic scholarship. Dr. T.J. Hundley ‘04, Assistant Professor in the Department of Internal Medicine, is the Alabama AΩA Beta Chapter Councilor.

DIVISION OF MEDICAL EDUCATION AND STUDENT AFFAIRS

The Division of Medical Education and Student Affairs is responsible for all undergraduate education programs in the College of Medicine. Reorganization of the structure of this office occurred over the past year. Three new Assistant Deans were appointed in the Division of Medical Education. The responsibilities of these new administrators focus on Educational Strategies and Faculty Development, Curriculum Assessment and Evaluations, and Curriculum Integration.

Activities in the Division of Medical Education and Student Affairs are accomplished through offices in the Medical Sciences Building and Mastin Building.

Student Affairs

The Medical Association of the State of Alabama once again sponsored Match Day festivities, which were held at the Renaissance Riverview Plaza Hotel in downtown Mobile on March 16. The Match results were impressive and included Cardiothoracic Surgery at University of Southern California Medical Center in Los Angeles, Orthopaedic Surgery at the Cleveland Clinic, Orthopaedic Surgery at Emory, and Dermatology at the University of Wisconsin. Two students will be going to Vanderbilt, one in Emergency Medicine and one in Pediatrics. Five of the students matched at the Greenville Hospital System of the University of South Carolina and other schools within the southeast. Fifteen students matched here at USA.

Honors Convocation for the College of Medicine was held Friday evening, May 11, 2012, in the Mitchell Center on the USA campus. Dr. Charles B. Rodning, Professor in the Department of Surgery, was selected as the faculty speaker by the Class of 2012 and Stephen Marbut was selected to be the class speaker. Awards for academic achievement and community service were announced and the Hippocratic Oath was administered. Graduation was held at 2 p.m. on May 12, 2012.

Freshman orientation in August 2012 was extended to include additional sessions, which focused on issues that will allow students to be successful in the integrated curriculum. The Professionalism session was modified into an active learning exercise to take advantage of the new active learning center. Based on the data from the post-orientation questionnaire, students were very satisfied with orientation.
The number of visiting medical students who participated in Senior elective courses at USACOM in 2011-2012 is outlined below:

Letters of evaluation (Dean’s Letters) were written for each of the 78 seniors, who graduated in May, 2012. Students applied to 2744 residency programs through the AAMC Electronic Residency Application Service (ERAS).

Seventy-two (72) of the seventy-eight (78) students matched for residency positions. Seventy-four (74) of the May graduates used the NRMP as their primary means of obtaining residency and four (4) graduates used the Military Match. Five (5) students secured a residency training position in the “scramble” that followed the match.

Seventy-eight seniors received the Doctor of Medicine degree at Commencement on May 12, 2012. On the evening of May 11, the College held its thirty-seventh Honors Convocation, which took place in the Mitchell Center. Dr. Charles Rodning addressed the class and Stephen M. Marbut responded for the graduates. Prior to hooding the graduates, the following awards were presented:

- **Dean's Award** – Travis Hunt Harris
- **Merck Award** – Richard William Gurich, Jr. and Phillip Dale Bates, Jr.
- **Leonard Tow Humanism in Medicine Award** – Dianna Marie Thomas and T. J. Hundley, M.D.
- **Medical Alumni Leadership Award** – Kacie Jackson Saulters
- **Medical Assurance Award** – Charles Caleb Butts
- **Community Service Award** – Cody Hunter Penrod and Britni Marie Bardshaw
- **SNMA Leadership Award** – Antwan Jerrod Hogue
- **Outstanding Student in the Anatomical Sciences** – Travis Hunt Harris
- **Charles M. Baugh Award in Biochemistry** – Travis Hunt Harris
- **William A. Gardner, Jr. Pathology Award** – Travis Hunt Harris
- **Charles W. Urschel Achievement Award in Physiology** – Travis Hunt Harris
- **Pharmacology Achievement Award** – William Maurin Perez
- **Microbiology and Immunology Achievement Award** – Travis Hunt Harris
- **Neuroscience Achievement Award** – James Gibson Pennington
- **Hollis J. Wiseman Award for Excellence in Pediatrics** – Thomas Cooper Wilson
- **Samuel Eichold Award** – Ryan Smith Weldon
- **Lewis Anderson Medical Student Achievement Award** – Margaret Elizabeth Saverino
- **John W. Donald Memorial Award in Surgery** – Richard William Gurich, Jr.; Erin Michele Thompson; and Thomas Cooper Wilson
- **H. C. Mullins, M.D. Award** – Ashleigh DeAnna Butts-Wilkerson
- **Obstetrics/Gynecology Award** – William Ray Stroud III
- **Excellence in Emergency Medicine Award** – Hannah Marie Eason and Jay Drennen Crim
- **American Academy of Neurology (AAN) Award** – Drew Ryan Uhrig

152
Evaluation of Student Performance in the First Postgraduate Year*

The questionnaire adopted by the Curriculum Committee in 1990-91 for assessment of graduates of the College of Medicine was sent to the Directors of the PGY-1 programs of our 2011 graduates. A total of 54 responses were received out of 69 requests. Below is a summary of the responses to the four major areas that were assessed.

*Evaluated by Residency Program Director and/or Faculty
CURRICULUM COMMITTEE

In 2011, the College of Medicine at the University of South Alabama revised the educational program by developing a new competency based curriculum across the four years. The first two years of medical school were redesigned from discipline-specific courses to an integrated organ systems-based curriculum with enhanced integration for the third and fourth years. The goal of the new curriculum is to provide medical students with a fully integrated educational experience by utilizing the core competencies established by the Accreditation Council for Graduate Medical Education as a platform. These competencies are medical knowledge, patient care, practice-based learning and improvement, interpersonal and communication skills, professionalism, and systems-based practice. While allowing students to acquire a comprehensive and clinically relevant medical education, the new competency based curriculum also will facilitate the educational continuum and aid in graduate’s transition into their residencies. The revision of the educational format occurred under the leadership team in the Division of Medical Education, the Curriculum Committee and with the enthusiastic support of both basic science and clinical faculty in the College of Medicine.

Students will begin the new curriculum with the Foundations of Human Health module, which introduces principles of basic and clinical sciences, and sets the foundation for medical practice. It provides students with tools to effectively master application-based material in the subsequent system based modules. Learners identify key principles of human health and disease in both the internal biologic milieu and external environment. Basic mechanisms of human biology, psychology and social systems are developed, as all are essential to clinical reasoning, problem solving, patient-centered care and system-based practice. Throughout this and subsequent modules, students will engage in lectures, active learning sessions (primarily team- and case-based), independent study and clinical experiences. Learners are introduced to reflective writing exercises. These activities will provide students with opportunities to strengthen communication skills, observe and participate in systems-based practice, and exercise practice-based learning techniques in a variety of settings that require and foster professional behavior and personal integrity.

Placement of Hematology and Host Defense ahead of the remaining modules is based on content relevance of the hematologic and immune systems to normal function and disease processes affecting all other organ systems. The module focuses on normal development, structure and function of the hematologic and immune systems, how they interface with infectious agents, and the etiology of related disorders, e.g. anemias, cancer, immunodeficiency, allergy, autoimmunity and infection. Upon conclusion of the module, students will understand the cellular and molecular mechanisms underlying clinical disorders explored in subsequent organ system modules and be able to apply their knowledge to appropriate patient care through proper diagnosis, treatment, management and prevention of these diseases.

The Cardiovascular System module is designed to provide students with an in-depth multidisciplinary survey of the system in health and disease. Each week is topically focused and framed by an introduction and discussion of relevant clinical vignettes. Development and aging in the cardiovascular system, cardiac function and rhythmicity, regulation of blood pressure, vascular function and dysfunction, risk factors for and epidemiology of cardiovascular disease, basics of clinical treatment strategies, and disparities in access to health care will be discussed.
Students will gain experience in taking and interpreting a patient history, as well as basic clinical skills relevant to assessment of cardiovascular function.

The **Respiratory System** module introduces students to the anatomy, physiology, and pathophysiology of the respiratory system with a particular focus on the lung's central role in gas-exchange and fluid balance. Normal and abnormal anatomy from the sinuses, nasopharynx, and upper airways to the lower respiratory tract, including the structures of the chest wall and thoracic cavity, will be presented through the combined use of pro-sections and radiologic imaging. The mechanics of breathing as well as the impact of diseases of the airway, interstitium, and pulmonary circulation on respiratory function, will be taught using lecture, patient-oriented active learning, clinical skills labs, and independent learning. Students will be taught the cellular and molecular mechanisms involved in a broad category of lung diseases including obstructive disease, restrictive disease, pulmonary vascular disease, lung cancer, and infections of the upper and lower respiratory tract. How these disease processes interact to alter gas-exchange leading to hypoxemia, hypercarbia, and respiratory failure will be an integral part of this course. Students will also gain experience in the proper diagnosis, treatment, and prevention of these respiratory diseases. The social impact of chronic respiratory disease on patients and their families, particularly for those with advanced disease, will also be highlighted during interactions with actual patients and in active learning sessions within small groups.

The **Renal System** module concludes year 1 and covers the kidneys and the urogenital system, including ureters, urinary bladder and prostate. Instruction begins with the normal development and structure, moves into the normal physiology of the kidney, introduces the action of pharmacological agents relevant to renal function, and concludes with introduction of pathological processes of infectious, oncological, and immune injury. Throughout the module, students are engaged in learning activities that challenge them to explore further the mechanisms of disease, the application of basic principles of organ structure and function to disease states, and approaches to problem-solving in the consideration of ethical and medical issues confronting patients with kidney disease. Students will be schooled in the evaluation of renal diseases through direct patient evaluation as well as the radiological and laboratory evaluation of kidney and urogenital structure and function. Through both directed and independent learning venues, students will have the opportunity to foster life-long learning skills, develop effective communications skills, and practice the cooperative skills needed to address the complex modes of effective delivery of medical care expected in the future. In sum, students will be given a foundation of basic medical knowledge spanning cellular to organ levels and the means to apply their knowledge of function and pathophysiology to the care of patients with urogenital disease.

Beginning Year 2, **Gastrointestinal System and Nutrition** focuses on the mastery of clinical and scientific principles involving the normal anatomic and physiologic functions of the mouth, esophagus, stomach, small and large intestine, along with the role of the pancreas and hepatobiliary tree. Secretory, motility, and absorptive functions throughout the upper and lower GI tract are a major focus of study. Students will also develop an understanding of nutritional and metabolic disorders as secondary complications of gastrointestinal and/or hepatobiliary disorders. Integration is achieved across all major medical basic science disciplines, as studies proceed throughout different portions of the digestive system at all levels, from molecular to cellular, to tissue, organ and organ system. Throughout the module, mechanisms of normal function involving metabolism, nutrition
and the normal microflora are studied in contrast with abnormal or disease states, in order to develop the foundation for understanding pathophysiologic mechanisms. Teaching methods include large group/lecture, small group, case based, learning activities, laboratories, computer simulations, self-study and experiences that foster the development of clinical skills and professional attitudes involving contact with patients in the clinic and hospital, and with simulated patients.

Reproduction and Endocrinology will enable students to acquire and apply knowledge of human development, internal homeostasis and reproduction from the human genome to clinical situations. Learners will develop an understanding of the embryological, physiological, and anatomical development of the reproductive tract, and how to evaluate the clinical presentation, prevention and treatment of male and female reproductive disorders, sexually transmitted infections, and breast diseases. Students will participate in active learning exercises focused on human sexuality. They will also develop their clinical examination skills, working with instructors who are trained in teaching female pelvic and breast exam and male genital examinations. Additionally, students will apply knowledge of endocrinology to discuss the role of hormones in development, growth, and metabolism.

Musculoskeletal System and Skin will cultivate the student’s ability to describe and diagnose conditions of the skin and the musculoskeletal systems. Students will learn how to apply their emerging knowledge of normal and abnormal, structure & function of these tissues and systems in order to recognize, and ultimately treat, conditions associated with injury and/or illness. The modules will begin with an introduction to dermatology by using a series of illustrative cases that portray the role of skin in normal physiology, development and aging, and disease. Through interaction with integrated, clinically relevant content in areas of head and neck and extremities anatomy, students will study the structures of the musculoskeletal system, in both the normal and diseased states.

Neuroscience and Behavior is designed to provide students with the knowledge and skills to understand and evaluate normal function, disease processes, injuries and psychiatric disorders of the human nervous system. Prior knowledge of other organ systems gained in previous modules enhances the conceptual understanding of clinical examinations skills used to measure neural function. The first 10 weeks focuses on the anatomy, biology and function of the central and peripheral nervous systems as students learn the diagnostic methods and criteria, pathophysiology and treatments of prevalent and prototypical neurologic injuries and disorders. Training shifts in the final two weeks to behavioral science as students learn about the classification, clinical presentation, psychopathology and treatment of prevalent psychiatric conditions. Upon completion of the module, students will have a fundamental understanding of the structure and function of the human nervous system, the clinical presentations, physical findings or laboratory findings of common neurologic and psychiatric disorders, and treatments for these conditions. Students will learn to take an accurate neurologic history, conduct the essential elements of the neurologic exam, perform a psychiatric assessment, and develop interpersonal skills and professional attitudes expected in the practice of neurology and psychiatry.
The final module, Integrated Case Studies, was originally developed as a USMLE Step 1 review course and requires students to raise their level of clinical reasoning and problem solving skill to consider multiple dimensions of illness or injury, in preparation for their transition to the practical world of clerkships. Students will consolidate basic skills in recognizing and describing clinical findings and develop skills in interpreting and communicating more complex clinical situations.
EXECUTIVE COMMITTEE OF STUDENT ASSEMBLY

As set forth in the Student Handbook, the Student Assembly addressed issues affecting student life. The officers for 2011-2012 were President – William Kilgo, Vice President – Benjamin Shepherd, and Secretary/Treasurer – Amanda Schnee. The Faculty Advisors were Dr. T. J. Hundley and Dr. Anthony Gard.

ISSUES Addressed by the Student Assembly

1) On May 2, 2011, there was a special student assembly meeting called with Dr. Gard and Dr. Hundley to discuss the upcoming new curriculum changes. The Committee was made aware of the changes being made for Fall 2012 in detail by the Curriculum Committee with regular updates from Dr. Gard and Dr. Hundley.

2) The Student Assembly explored the idea of having the USACOM Residency Fair in the Spring annually rather than in the fall. Lack of response forced the issue to be tabled for next year. The Residency Fair was taken over from AMWA and Student Assembly is in charge of sponsoring and organizing it beginning in 2012-13 academic year.

3) Efforts were made to increase attendance by medical students at the “Conversations with the Dean” lectures.

4) The Halloween Party was held on October 28, 2011 at the Corner Bar.

5) Parking concerns for medical students at Children’s and Women’s Hospital were addressed by the creation of a flyer that clarified many of the recurrent problems that have caused confusion in the past.

6) The Christmas Party was held on December 9, 2011, at the Alabama Music Box.

7) A debt seminar was held on February 23, 2012, for interested 4th year students.

8) The Aesclepiad Ball was held on March 3, 2012, at the Mobile Carnival Museum.

9) Match Day was held on March 16, 2012, at the Renaissance Riverview Hotel.

10) The Gumbo Chili Showdown was held in order to raise funds for the Regan Robinson Memorial Fund. The date of the event was March 24, 2012, at its new location, Ladd-Peebles Stadium, prior to the University of South Alabama Spring Football game.

11) Student Assembly officers elected for 2012-2013 are President – Kasey Gardner, Vice President – Mary Walker, and Secretary/Treasurer – Alicia Glass.

12) Fourth year students held a yard sale on April 21, 2012, in the parking lot at Grace Community Church.

13) Skit Night was held on May 4, 2012, at the Mobile Convention Center.

An Emergency Loan Fund is available to medical students. Loans of up to $500 may be obtained by students through a fund administered by the Office of Student Affairs and Medical Education for a period of up to 60 days for the purpose of alleviating an unanticipated financial need. There is no interest charged. During the period August 1, 2011, through July 31, 2012, four (4) emergency loans were approved for a total amount of $2,500.00. During that period, seven (7) payments totaling $4,000.00 were paid back into the loan account.
OFFICE OF EDUCATIONAL ENRICHMENT

Diversity, Recruitment, and Enrichment for Admission into Medicine (D.R.E.A.M.)

The summer of 2012 marked the twenty-sixth (26th) year of the summer recruitment and enrichment program at the University of South Alabama College of Medicine. Over this period of time, the program has served a total of 262 students.

Recent University budget challenges has made it necessary to reduce the number of program participants, for the fourth year in a row, to the original number, seven (7), accepted when the program first began in 1986. However, in the year 2012, consideration is being given to an increase to 10-12 participants.

The focus of the D.R.E.A.M. continues to be promoting diversity within our college giving primary consideration to educationally and economically disadvantaged candidates to facilitate their dreams of becoming physicians. The envisioned outcome is that these students will remain in the state and return to their communities to serve underserved populations and help eliminate health disparities within our state and the nation.

Phase II

There were six of seven students who successfully completed Phase I of the program in the summer of 2011. Five (5) returned in 2012 for Phase II, and one (1) student from Prairie View A&M chose to attend another program. The 2012 Phase II students represent four (4) different institutions:

- Alabama A&M ....................... 1
- Alabama Huntsville ............. 1
- Alabama State .................... 2
- University of Florida ............ 1

Two (2) of the five (5) Phase II students are Alabama residents; one (1) is a resident of Anchorage, Alaska, one (1) is a resident of St. Martinville, Louisiana, and one (1) is a resident of Palm Coast, Florida.

A 2012 curriculum change from a series of departmental/discipline-specific topics focused on first year medical school preparation taught by ~50 different faculty and graduates to a curriculum that focuses on four scientific disciplines (i.e., biology, general chemistry, organic chemistry, and physics) that are tested by the Medical College Admissions Test (MCAT) was instituted. A Speed Reading/Comprehensive course was also enhanced in the 2012 curriculum to include Critical Thinking and Medical Vocabulary. To test these changes, the DREAM Committee decided to eliminate Phase I for this summer and allow the Phase II cohort to finish the program. Therefore, there were no new students accepted into the program. The MCAT sciences were taught by five second year medical students who were chosen based on their high achievement on the MCAT. The Speed Reading course was taught by a doctoral candidate from the College of Education. Students were required to take a different practice MCAT every Saturday, participate in a formal medical issue debate, do two mock medical school interviews, and attend seminars on AMCAS application, financial aid, and medical school coping strategies presented by our students.
The 2012 program was radically different but the students clearly understood what was being done differently and became fully engaged. To date, two of the five students have notified us that they have achieved MCAT scores qualifying them for admission and one has already submitted a primary application. Achieving acceptable MCAT scores does several things; it assures the Admissions Office that the applicant has a predictable chance of graduating in four years, and more importantly, it forces an acceptance of a style of standardized test taking in which complex materials can be tested in short amounts of time (~72 seconds per question). Mastering this technique is useful throughout medical school.

**Admission**
In August of 2012, one (1) male and two (2) female D.R.E.A.M. students entered the University of South Alabama College of Medicine freshman class. The new students represent Alabama A&M, Auburn University, and the University of South Alabama. The students are residents of Andalusia, Alabama; Columbus, Georgia; and Pascagoula, Mississippi.

**Other Recruitment**
In 2011, the Office of Educational Enrichment made recruitment trips to two (2) colleges and universities: Tuskegee and the University of North Alabama. Presently, three (3) recruitment trips are scheduled for 2012: Stillman, University of Alabama, and Alabama State University.
OFFICE OF ADMISSIONS
2011-2012

Applicant Pool and Acceptance Data

The University of South Alabama College of Medicine participates in the American Medical College Application Service (AMCAS). The period for receiving applications to the College of Medicine for the class entering August 13, 2012, opened June 1 and closed November 15, 2011.

For the Class of 2016, one thousand three hundred nine (1309) applications were received. Three hundred fifty-seven (357) applications were received from Alabama residents, eight hundred seventy-four (874) applications from out of state U.S. citizens, including seventy-two (72) from adjacent service area counties in Mississippi and Florida, and seventy-eight (78) applications from citizens of foreign countries. The Admissions Committee interviewed a total of two hundred twelve (212) applicants of which two hundred (200) were residents of Alabama. Of the applicants interviewed, one hundred sixty (160) were offered admission to fill a class of seventy-four (74). Sixty-seven (67) of the matriculating students are Alabama residents and four (4) are from our service area counties. Thirteen (13) offers of admission were made to black applicants, four (4) have matriculated. Three (3) of the matriculating black students are DREAM (Diversity Recruitment and Enrichment for Admission into Medicine) students. This year our records indicate an increase in the number of applicants (1271 in '11 vs. 1309 in '12); there is a small decrease in Alabama applicants (389 in '11 vs. 357 in '12). Table I gives comparative data since 2009.

The matriculating Class of 2012 represents twenty-three (23) colleges and universities from the United States. Sixty-six percent (66%) of this year’s class, however, come four (4) universities in the state.

Recruitment and Retention Efforts

1. Undergraduate campus recruiting visits and sophomore interviews were implemented by “teams” of faculty and administration. The USACOM recruiting teams counseled over 300 premedical students at eight colleges and universities.

2. The Director of Admissions served as the admissions counselor and advised prospective students on a daily basis. In addition, selected faculty members advised prospective applicants periodically.

3. Premedical visitation day programs were organized and conducted to provide prospective applicants with an opportunity to tour the College of Medicine facilities, review the application process, meet with medical students and faculty, and obtain information on financial aid, housing, and the community.

4. Informative health career related programs were organized and conducted upon request for high school students, community organizations, and premedical special interest groups.
5. The following publications were produced and distributed by the Office of Admissions: The College of Medicine Bulletin, Policies and Procedure Manual.

6. Special admissions reports and correspondence were produced and distributed annually to in-state premedical advisors and selected out-of-state advisors.

7. A total of sixteen (16) Applicant Interview Day programs were conducted from September until mid-March. The interviewers, primarily College of Medicine basic science and clinical faculty, serve as members of the Committee on Admissions and/or ad hoc members. These members interviewed two hundred twelve (212) candidates; each interviewee was interviewed by three committee members, giving a total of six hundred thirty-six (636) interviews.

8. The following Admissions Committee subcommittees were active in 2011-2012: Scholarship Subcommittee; Alternate List Subcommittee; Early Acceptance Program Subcommittee

**Early Acceptance Program**

In 1990, the College of Medicine and the University's Health Pre-Professions Program established an Early Acceptance Program for qualified high school graduates interested in a career in medicine. Candidates selected for this program must have a minimum high school GPA of 3.5 and an ACT score of 28 (or comparable SAT). Candidates selected for this program receive early acceptance from the University of South Alabama College of Medicine. The students enter the Health Pre-Professions Program at the University of South Alabama, and their curriculum includes the core requirements for their selected baccalaureate program and prerequisites for entering medical school. Students in this program must maintain a specific grade point average during college and are required to meet all other requirements for entering medical school. Students participate in a variety of activities on an individual basis to provide a broad exposure to medical education. Students participating in the program are expected to enter the College of Medicine following completion of the baccalaureate degree.

This year, ninety-four (94) applications were received from students wishing to enter this program. After a screening process, forty-five (45) of the applicants were selected for interviews and seventeen (17) were offered admission to the program.

OFFICE OF CONTINUING MEDICAL EDUCATION

The Office of Continuing Medical Education completed the 2011 reaccreditation application and review process. Reaccreditation with Commendations was sought missing the goal by three of 22 criteria. The Office of CME was granted reaccreditation with a four-year term and no progress reports required.

In 2011-2012 the OCME coordinated CME activities provided by the clinical departments and outside agencies. There were approximately 463 regularly scheduled series (Grand Rounds) for 562 CME credit hours, 2 enduring materials for 3.5 CME credit hours, and 13 unique activities (conferences) accounting for 82.50 CME credit hours. In total 5,516 physician credit hours were awarded and 3,703 non-physician credit hours were awarded. Additionally, two joint sponsorship programs with outside agencies were supported by the Office of CME. The office is currently revising the CME website as well as its online enduring materials.

Significant CME Achievements:

- Reaccreditation
- Additional Joint-Sponsorship activities
- Coordination with Office of GME
- Introduction of Point-Of-Care CME
- Created online sign-in-sheets
- Created online evaluation
- Implemented program of "claiming" CME credits upon completion of activity
- Created printable CME certificates upon completion of activity evaluation
- Coordinating and designing Performance Improvement CME
- Improved online CME activities
- Implemented online disclosure process
- Discussions for possible collaboration with Colleges of Nursing and Allied Health
- Assisting Mobile County Health Department in addressing Joint Commission concerns
- Working with Performance Improvement Committee in addressing Core Measures

CME Plans for 2012-2013:
1. Continue to develop a "research" aspect to the development and utilization of CME.
2. Develop criteria for effective use of audience response system.
3. Host CME Educational Forum for local CME / CEU providers.
4. Develop Performance Improvement CME opportunities for all clinical departments.
OFFICE OF GRADUATE MEDICAL EDUCATION

Organizational Structure

The Graduate Medical Education (GME) Office is under the direction of Carole W. Boudreaux, M.D., Assistant Dean for Graduate Medical Education and Designated Institutional Official at the University of South Alabama Hospitals, Mobile, Alabama. Dr. Boudreaux and staff are responsible for the oversight of ACGME accreditation status and the educational environment, as well as administrative issues for all University of South Alabama Hospitals residency and fellowship programs.

The GME Office implements policies of the Graduate Medical Education Committee (GMEC) at the University of South Alabama Hospitals. The Accreditation Council for Graduate Medical Education (ACGME) charges the GMEC with responsibility for monitoring and advising on all aspects of residency education including compliance with ACGME duty hour standards and creating a strong working and learning environment. The GMEC is composed of program directors, teaching faculty, designated representatives of the major teaching hospitals and residents selected by their peers. The Assistant Dean for Graduate Medical Education reports activities of the Graduate Medical Education Committee to the Dean, College of Medicine. Meetings of the GMEC are held monthly and include review and approval of requests by programs for changes in resident complement and changes in program directors among other procedural approvals required by the ACGME. The GMEC is responsible for reviewing current issues facing residency and fellowship training programs. The Committee also conducts Internal Reviews of residency and fellowship programs and sets institutional policy to ensure that the quality of education and the work environment for residents and fellows meets or exceeds the standards of the ACGME and USA Hospitals.

Overview

The University of South Alabama Hospitals (USAH) sponsored 11 residency and 7 fellowship programs with 246 residents and fellows during the 2011-2012 academic year.
All residency and fellowship programs are accredited by the Accreditation Council for Graduate Medical Education (ACGME)

Program Closures

The Infectious Disease fellowship program has requested voluntary withdrawal of accreditation effective July 1, 2013, so that the current fellow in the program can complete his training. This will allow the program to regroup in addressing a number of citations from their last site visit. In reviewing the citations received by the ID program, themes were identified affecting multiple programs in the institution including institutional support, specifically, the annual program budgetary process; academic productivity at the resident and faculty level; and the authority of the GME Office/ DIO and GMEC to oversee the programs’ substantial compliance with ACGME requirements. These issues are being addressed at an institutional level via an institutional plan of action task force.

The Orthopedic Surgery/Sports Medicine program has also requested voluntary withdrawal of accreditation due to loss of resources for funding its fellowship position.
ACGME Accreditation Site Visits

The following programs were site visited or received RC (Review Committee) accreditation during 2011-2012:

Summary of Activities and Progress

Resident Participation in Patient Safety and Quality of Care Education

Incoming residents and fellows are introduced to the various USA Hospitals quality and patient safety programs upon matriculation into the institution as part of new resident/fellow hospital orientation. The institution provides GME Today online instructional modules for all new incoming residents and fellows in the ACGME six core competency domains, some of which specifically address patient safety. All residents and fellows in the institution will be required to complete the GME Today instructional module on cultural competency for the 2012-2013 academic year, and new incoming residents and fellows will be required to complete the GME Today educational module on achieving effective transitions of care. A subcommittee of the GMEC was appointed to develop an institutional QI program during the 2011-2012 academic year. Projects are now ongoing with presentation on a rotating basis at the monthly chief resident meetings as oversight. USA Online instructional modules have been developed to accompany simulation lab experiences for standardized instruction in areas that will improve patient safety such as ultrasound-guided central line insertion.

Residents are appointed to various hospital committees that work to improve patient care and patient safety. “Dropbox” has been adopted for use by residents, fellows and faculty within the institution. Dropbox is an electronic application that allows documents to be accessed anywhere. Any file saved to the Dropbox will be automatically saved to smart phones, electronic tablets, computers and the Dropbox website. Resources housed in the USA GME Dropbox account include patient safety resources such as “The Top 10 List for a Safe and Effective Sign-out” (Kemp et al: Arch Surg. 2008; 143(10): 1008-1010); “Resident Sign-Out; A Precarious Exchange of Critical Information in a Fast-Paced World (from Borowitz, et al; Advances in Patient Safety: New Directions and Alternative Approaches) as well as quick references for core measures. While the above initiatives outline a number of ways residents are involved in and exposed to the concept of patient safety in the institution, there is not an overarching patient safety educational plan in place. Dr. Joyce Guest, GME Instructional Design Specialist, has been tasked with serving as a liaison between the hospitals and the GMEC to coordinate the development of such an initiative in the coming academic year. This will be especially important as the institution transitions to the “Clinical Learning Environment Review” (CLER) program under the ACMGE’s Next Accreditation System. Programs were required to educate their residents and faculty in recognizing the signs of sleep deprivation and fatigue and to employ mechanisms to mitigate the negative effects of fatigue during the 2011-2012 academic year.

Additional initiatives undertaken by the GMEC during the 2011-2012 academic year include:

The newly reconfigured USA GME website that was updated to create a more user friendly resource for addressing all aspects of GME. Separate sections for residents, program directors, program coordinators, and resident applicants were developed. Numerous links to a variety of useful resources were put into place.
USA Online Educational Resources have been developed for programs’ use in the instruction of “Critical Assessment of the Literature and How to Write A Scientific Paper,” “Evidence-based Medicine,” “Delivering Bad News,” “Ultrasound-guided Central Line Insertion,” and “Quality Improvement” as well as program specific resources in use by some individual programs.

A GME Faculty Development Sakai module housing the Duke University “Life Curriculum” was made available to the programs via USA Online.

New instructional resources utilizing the simulation lab were developed for use by all programs in the areas of “Delivering Bad News” and “Ultrasound-Guided Central Line Insertion.” Tegrity, the University’s Lecture Capture System, was made available for use by the individual programs, and grand rounds and other departmental activities are now being recorded for access in Tegrity.

The USA Housestaff Association has been revitalized. A membership drive followed by an educational program on Debt Reduction was sponsored by the Association in May, 2012. Quarterly educational programs to support residents’ personal and professional development sponsored by HCA will be scheduled for the upcoming academic year. The DIO meets quarterly with the Board of Directors of the USA Housestaff Association for feedback about the hospitals’ learning and working environment. Non-voting representatives from the Housestaff Association are included in GMEC meetings.

Dr. Franklin Trimm has volunteered to head up this next Accreditation System Task Force to facilitate transitioning the initial programs in our institution that will come up in the new ACGME accreditation program effective July, 2013.

Research

Joyce Guest, Ph.D., GME Instructional Design Specialist, was awarded a $3,000.00 grant from the Office of the Vice President for Health Sciences at the University of South Alabama to Enhance Inter-professional Education Across the Health Sciences.
2011-2012
Summary of Activities
Medical Student Summer Research Program

The Thirty-ninth Annual Medical Student Research Day was held on Friday, August 3, 2012 hosting approximately 150 attendees in the Medical Sciences Building auditorium and College of Medicine Conference Room. Twenty first and second-year medical students participated in research projects with basic science and clinical faculty in the College of Medicine during the summer. A weekly seminar series introduced students to important research related topics. The program aims to highlight the relation between scientific discoveries and their application in clinical medicine.

Dr. David Robertson, Elton Yates Professor in Autonomic Disorders, and Departments of Neurology, Medicine, and Pharmacology at the Vanderbilt University School of Medicine was the keynote speaker. Dr. Robertson’s seminar was entitled, “The New Paradigm of Genome Research in Human Disease.”

Culmination of the summer’s work was the presentation of eight oral and twelve poster presentations at the Annual Medical Student Research Day. Student presentations and their faculty sponsors were as follows:

**ORAL PRESENTATIONS**

Thomas Holcombe, freshman medical student. Focal adhesion kinase regulates the expression of inflammatory cell adhesion molecules in endothelial cells. Sponsored by Lim, Steve, Ph.D., Department of Biochemistry and Molecular Biology.

Stefan Osborn, sophomore medical student. Microparticle contents isolated from proliferating pulmonary cells. Sponsored by Bauer, Natalie, Ph.D., Department of Pharmacology, and Sayner, Sarah, Ph.D., Department of Cell Biology & Neuroscience, and Center for Lung Biology.

Andrew Schneider, sophomore medical student. The presence of SIRS in burn and trauma patients correlates with altered microvascular function. Sponsored by Richards, William, M.D., Simmons, Jon, M.D., Gonzalez, Richard, M.D., Frostan, Mohammed, M.D., Department of Surgery, and Gillespie, Mark, Ph.D., Department of Pharmacology, Alvarez, Diego, M.D., Ph.D., Departments of Internal Medicine and Pharmacology, Center for Lung Biology.
Christopher Smith, sophomore medical student. Disrupting ICOS: ICOS ligand interaction in lupus-prone mice. Sponsored by Barrington, Robert, Ph.D., Department of Microbiology and Immunology.

POSTER PRESENTATIONS

R. Frank Bumpus, sophomore medical student. Hyperspectral measurement and analysis of cellular fluorescent signals. Sponsored by Rich, Thomas, Ph.D., Alvarez, Department of Pharmacology, Diego, M.D., Ph.D., Departments of Internal Medicine, Pharmacology, and Center for Lung Biology, and Leavesley, Silas, Ph.D., Department of Chemical and Biomolecular Engineering.

Stephen Cheek, sophomore medical student. NCK-interacting kinases phosphorylates cofilin and inhibits breast cancer cell invasion. Sponsored by LeClaire, Lawrence, Ph.D., Department of Biochemistry and Molecular Biology.

Jordan Fernandez, freshman medical student. Cloning, expression, and purification of 3β-hydroxysteroid dehydrogenase from E. Coli. Sponsored by Honkanen, Richard, Ph.D., Department of Biochemistry and Molecular Biology.

Brandon Finnorn, freshman medical student. Functional glycomics of the pulmonary and systemic vasculature: lectin histochemistry for probing differentiated glycoproteins. Sponsored by Cioffi, Eugene, Ph.D., Department of Pharmacology and Center for Lung Biology.

Christopher George, sophomore medical student. Three dimensional imaging of the plexiform lesion. Sponsored by Oka, Masahiko, M.D., Ph.D., Stevens, Troy, Ph.D., Department of Pharmacology, and Center for Lung Biology.

Hayden Hundley, sophomore medical student. Reverse toilet training patterin in children with higher functioning autism. Sponsored by Swingle, Hanes, M.D., M.PH., and Department of Pediatrics, and Wooster, Donna, Ph.D., Department of Occupational Therapy.

Christopher Mills, sophomore medical student. Sodium bicarbonate regulation of intracellular PH in pulmonary artery and pulmonary microvascular endothelial cells. Sponsored by Sayner, Sarah, Ph.D., Department of Cell Biology and Neuroscience, and Center for Lung Biology.
Megan Missanelli, sophomore medical student. Accuracy of various imaging modalities in predicting pathologic breast tumor size. Sponsored by Dyess, Lynn, M.D., Department of Surgery, Qureshi, Yasmeen, M.D., Department of Radiology, and Tucker, J. Allan, M.D., Department of Pathology.

Audrey Paulzak, sophomore medical student. The effect of bariatric surgery on the level of activated caspase-1. Sponsored by Nijhawan, Sheetal, M.D., and Richards, William, M.D., Department of Surgery, and Alvarez, Diego, M.D., Ph.D., Departments of Internal Medicine and Pharmacology.

Austin Reece, sophomore medical student. The role of α5β1 integrin in vasoconstriction of pulmonary arteries in an animal model of severe pulmonary arterial hypertension. Sponsored by Fagan, Karen, M.D., Departments of Internal Medicine and Pharmacology, and Center for Lung Biology.

Kyle Taylor, sophomore medical student. Role of Kca3.1 (IK) channels in myometrial contractions. Sponsored by Taylor, Mark, Ph.D., Department of Physiology.

The Clyde G. "Sid" Huggins Medical Student Research Awards were presented to Mr. Jonathan Wolfe, sophomore medical student for best oral presentation entitled, "Compensatory movement strategies of walking in multiple sclerosis." He was sponsored by Anthony Martino, M.D., and Christopher Eckstein, M.D., Departments of Surgery and Neurosurgery, respectively, and Wei Liu, Ph.D., Department of Physical Therapy. Mr. Christopher Smith also tied for the best oral presentation award entitled, "Disrupting ICOS: ICOS ligand interaction in lupus-prone mice." He was sponsored by Robert Barrington, Ph.D., Department of Microbiology and Immunology. Mr. Hayden Hundley, sophomore medical student was presented best poster presentation entitled, "Reverse toilet training pattern in children with higher functioning autism." He was sponsored by Hanes Swingle, M.D., M.PH., Department of Pediatrics, and Donna Wooster, Ph.D., Department of Occupational Therapy. Each winner was presented with a plaque of recognition and cash award. Recipients are eligible to make their presentations at the Annual National Research Forum in Galveston, Texas.
Graduate Program in Basic Medical Sciences

Administration

Many thanks to Dr. Ronald Balczon for serving at Director of the Basic Medical Sciences Graduate Program for the previous six years. Basic Medical Science Graduate Faculty elected Dr. Joseph Brewer to serve as the next Director. He assumed duties of the directorship on July 1, 2012.

Admissions

The Graduate Program Office processes applications and hosts interviews for prospective students to the program.

Interviews for Basic Medical Sciences Graduate Program Fall 2012 Class applicants were held in February, March, April, and June. A total of 16 students were interviewed (US=13; International=3). A summary of Admissions activity is provided below.

Recruitment Activities

1. Graduate Program faculty presented information at regional high school science conferences and fairs.
2. Dr. Balczon met with faculty colleagues at regional colleges and universities during Fall, 2011. Dr. Balczon and Ms. Flagge participated in the Alabama Connection Graduate School Recruitment Expo in October, 2011. Ms. Flagge represented the program at the Louisiana Private College Graduate Program Expo in North Louisiana in September, 2011 and participated in the ARK-LA-TEX-MS Career Fair in April, 2012.
3. Presentations were made to USA’s Premedical Honors Society and Freshman Biomedical Sciences students.
4. Students and faculty from William Carey University attended the Basic Medical Sciences Graduate Forum in December, 2011.

**Curriculum** Instructional format for IDL 581 Fundamentals of Biomedical Sciences course was altered.

**New Programs/Policies/Requirements**

Recommendations from the 2011 self-study review under current development include:

a. establishing criteria for track leaders
b. establishing additional tracks
c. revising track curricula

**BMSSO-Basic Medical Sciences Student Organization**

BMSSO hosted meetings in which personnel from academic, governmental, and industry sites addressed students on topics including developing CV’s and employment opportunities with agencies such as NIH, CDC, etc. The organization also hosted the annual Charles Baugh “Dawg Day” during the 2011 Fall Semester and a Faculty Appreciation Shrimp Boil in July, 2012. They sponsored a coat drive in February, 2012 to benefit residents at St. Mary’s Home and hosted a “welcome” reception at Dr. Gerthoffer’s home for the 2012 Class during Orientation Week in August, 2012.

**Extramural Support for Graduate Training**

1. Six students continue to receive stipend support via the NIH Predoctoral Institutional Training Grant on “Cell Signaling and Lung Pathobiology.”
2. BMS Graduate Program students received extramural grant awards through American Heart Association and EPSCOR. Travel awards to national conferences and annual meetings in the disciplines were also received.

**Graduates**

One hundred eighty-two students have received a Ph.D. in Basic Medical Sciences. Students completing all requirements during the academic year (September 2011-August 2012) are:

**Amanda Mae Beaster**

**DISSEPTION TITLE:** “Characterization of Autophagy-Related Phenotypes of the Obligate Intracellular Pathogen Rickettsia Prowazekii”

**MAJOR PROFESSOR:** David Wood, Ph.D.

**DEPARTMENT/TRACK:** Microbiology and Immunology

**CURRENT POSITION:** Medical Writer, MMS Holdings, Inc., Canton, MI
Daniel John Devine
DISSEMINATION TITLE: “Elucidating the Role of N-Myc Interactor on Epithelial-Mesenchymal Transitions and Tumor Progression”
MAJOR PROFESSOR: Rajeve S. Samant, Ph.D.
DEPARTMENT/TRACK: Cancer Biology
CURRENT POSITION: Postdoctoral Fellow; St. Jude Children’s Hospital, Memphis, TN

Tracy Yvette Dodd
DISSEMINATION TITLE: “Regulation of MMPs During Coronary Collateral Growth”
MAJOR PROFESSOR: Petra Rocic, Ph.D.
DEPARTMENT/TRACK: Biochemistry and Molecular Biology
CURRENT POSITION: Postdoctoral Fellow; LSU Health Sciences College of Medicine, Department of Physiology, New Orleans, LA

Wei Pan Feinstein
DISSEMINATION TITLE: “Cellular Mechanisms Contributing to Cyclic AMP Compartmentalization”
MAJOR PROFESSOR: Thomas Rich, Ph.D.
DEPARTMENT/TRACK: Pharmacology
CURRENT POSITION: Postdoctoral Fellow; Louisiana State University Department of Biology, Baton Rouge, LA

Lillianne Gracelynn Harris
DISSEMINATION TITLE: “The Role of Mechanisms of Hedgehog Signaling in Promoting Tumor Vascularization and Malignancy”
MAJOR PROFESSOR: Lalita Samant, Ph.D.
DEPARTMENT/TRACK: Cancer Biology
CURRENT POSITION: Postdoctoral Fellow; The Medical University of South Carolina, Charleston, SC

Mitchell Esmeralda Menezes
DISSEMINATION TITLE: “Elucidating the Role of Heat Shock Protein MRJ(L) in Tumor Growth and Metastasis”
MAJOR PROFESSOR: Rajeve S. Samant, Ph.D.
DEPARTMENT/TRACK: Cancer Biology
CURRENT POSITION: Postdoctoral Fellow; Virginia Commonwealth University, Richmond, VA

Kyle Adam Morrow
DISSEMINATION TITLE: “Elucidating the Role of the Tumor Suppressor Protein Merlin in Breast Cancer”
MAJOR PROFESSOR: Lalita Samant, Ph.D.
DEPARTMENT/TRACK: Cancer Biology
CURRENT POSITION: Postdoctoral Fellow; Center for Lung Biology, University of South Alabama, Mobile, AL

Aimee Marie Tucker

DISsertation TITLE: “Functional Analysis of Rickettsial RalF: A Secreted Effector of Rickettsia prowazekii”

MAJOR PROFESSOR: David Wood, Ph.D.

DEPARTMENT/TRACK: Microbiology and Immunology

CURRENT POSITION: Postdoctoral Fellow; Department of Microbiology and Immunology, University of South Alabama, Mobile, AL
Summary of Extramural Support

Funding for the 2011-2012 academic year includes $12,670,425 and $3,128,661 in awards administered through the Office of Sponsored Programs and the South Alabama Medical Science Foundation, respectively.
